RISKS RELATING TO OUR BUSINESS

1. ***Our revenue is dependent on the domestic market since, it contributes significantly to our total revenue from operations. Any adverse changes in the conditions affecting domestic market could adversely affect our business, results of operations and financial condition.***

While our products have wide geographical reach, our revenue is significantly dependent on sales of products and services within the domestic market i.e. in India. We export our products to markets across Asian, APEC, Africa, Middle East and European regions. In the event of any slowdown in domestic market, or any developments that make our products or services less attractive in domestic market, we may experience more pronounced effects on our business, results of operations, and financial condition than if we had further diversified revenue across different geographical locations. Details for the revenue generated from the domestic market and through export as per restated financials are as follows:

Particulars	Domestic sales		Export Sales	
	Total Revenue (₹ in lakhs)	% of revenue from operations	Total Revenue (₹ in lakhs)	% of revenue from operations
For the six months period ended September 2024	3,894.65	85.40%	665.83	14.60%

Particulars	Domestic sales		Export Sales	
	Total Revenue (₹ in lakhs)	% of revenue from operations	Total Revenue (₹ in lakhs)	% of revenue from operations
Fiscal 2024	8,537.45	85.56%	1,441.30	14.44%
Fiscal 2023	7,981.66	82.34%	1,712.36	17.66%
Fiscal 2022	4,606.27	73.22%	1,684.71	26.78%

For further information of countries that we export our products, please refer to chapter titled “**Business Overview**” beginning on page 143 of this Prospectus.

Our business, results of operations and financial condition have been and will continue to be largely dependent on the prevailing domestic market conditions and any adverse changes in the conditions affecting domestic market related to our business operation, may adversely affect our business, results of operations and financial condition

2. ***We operate only one manufacturing facility and therefore, any localized social unrest, natural disaster, or breakdown of services, in and around our manufacturing facility or any disruption in production at, or shutdown of our manufacturing facility could have a material adverse effect on our business and financial condition.***

Our sole manufacturing facility is located in Plot No.6, Survey No. 91/ Paiki-4, Near Sheela Foam, village- Zaroli, Umbergaon, District Valsad, Gujarat. Further, the expansion will be constructed on the land where our existing manufacturing facility is situated. Any material adverse social, political or economic development, natural calamities, civil disruptions, or changes in the policies of the state government or local governments in this region could adversely affect our manufacturing operations, and require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Our business is dependent upon our ability to manage our manufacturing activities, which are subject to various operating risks, including political instability, productivity of our workforce, compliance with regulatory requirements, difficulties with production costs and yields, product quality and those beyond our control, such as the breakdown and failure of equipment or industrial accidents, disruption in electrical power or water resources, severe weather conditions, natural disasters and an outbreak of pandemic such as COVID-19. We have taken initiative to mitigate some of this risk by introducing Layout automation XRF machine for automations of the process and installation of 450.00 KWp peak of solar plant with a further expansion of approx. 400.14 KWp peak passed through board resolution dated August 02, 2024. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. Moreover, some of our products are permitted to be manufactured only if specific approvals are received or are valid, and any failure to obtain such approval or their renewal will unable us to manufacture the said products for the duration until the said approval is obtained or renewed. For instance, the approvals issued by Gujarat Pollution Control Board (“GPCB”) in respect of our manufacturing facility permits us to manufacture welding electrodes, manufacture of various types of flux cored wires, metal cored wire, cutting wheels, grinding wheels papdi wheels and segment wheels. Our inability to effectively respond to any shutdown or slowdown and rectify any disruption, in a timely manner and at an acceptable cost, could lead to delays in the entire production cycle and an inability to comply with our customers’ requirements and lead to loss of revenue to us and our customers.

Although we have not experienced any strikes or labor unrest in the past 5 years, we cannot assure you that we will not experience disruptions in work in the future due to disputes or other problems with our workforce. Any labor unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations, which in turn could adversely affect our business, results of operations, financial condition and cash flows.

3. ***We may face several risks associated with the proposed expansion in our existing manufacturing facility, which could hamper our growth, prospects, cash flows and business and financial condition.***

We intend to utilize a portion of the Net Proceeds of the Fresh Issue for financing the proposed expansion of our manufacturing facility. For additional details in respect of the foregoing, please refer to chapter titled “**Objects of the Offer**” beginning on page 103 of this Prospectus.

We are in the process of undertaking Proposed Expansion of our existing manufacturing facility at Plot No.6, Survey No. 91/ Paiki-4, Near Sheela Foam, village- Zaroli, Umbergaon, District Valsad, Gujarat (“Proposed Expansion”), all of which would require substantial capital expenditure passed through board resolution dated August 02, 2024

Out of the Net Proceeds of Fresh Issue, ₹ 488.66 Lakhs is proposed to be utilized towards funding capital expenditure requirements at the Proposed Expansion. The completion of the setting up of the Proposed Expansion is dependent on our ability to arrange finance through Net Proceeds of Fresh Issue or otherwise, the performance of vendors which are responsible for inter alia construction of factory shed, plinth & cementing, footing work, road work and

solar rooftop. We cannot assure you that we will be able to arrange for such finance on time. Further, we cannot assure you that the performance of vendors will meet the required specifications or performance parameters. In expansion of our existing manufacturing facility, we may encounter cost overruns or delays for various reasons, including, but not limited to, our financial condition, changes in business strategy and external factors such as market conditions, government restriction on import from countries sharing land borders with India, competitive environment and interest or exchange rate fluctuations, changes in design and configuration of the projects, increase in input costs of construction materials and labour costs, incremental preoperative expenses, taxes and duties, start-up costs, interest and finance charges, working capital margin, environment and ecology costs and other external factors which may not be within the control of our management. If any of the proposed expansion that we propose to set up at our existing manufacturing facility, are not completed in a timely manner, or at all, our business, prospects and results of operations may be adversely affected. Further, the budgeted cost may prove insufficient to meet the requirements of the proposed capital expenditure due to, among other things, cost escalation, which could drain our internal cash flows or compel us to raise additional capital, which may not be available on terms favourable to us or at all.

We cannot assure that we will be able to complete the aforementioned expansion of our manufacturing facility in accordance with the proposed schedule of implementation and any delay in expansion in a timely manner, or at all, could have an adverse impact on our growth, prospects, cash flows and business and financial condition.

4. *We depend on outside parties for adequate and timely supply of raw materials at commercially acceptable prices. Any disruptions, delay or increase in prices of such material may have a material adverse effect on our business.*

Our ability to remain competitive, maintain costs and profitability depend, in part, on our ability to source and maintain a stable supply of raw materials at acceptable prices. We procure some of our primary raw materials, such as copper coated wire, MS Strips, MS wire, SS strip, SS wire, nickel wire, ferro alloy powder and other raw materials required in manufacturing process on a purchase order basis and have not entered into long term contracts for the supply of such raw materials. Our raw materials consumed for the six months period ended September 30, 2024, FY 2024, FY 2023 and FY 2022 was ₹ 3,609.34 Lakhs, ₹ 6,383.68 Lakhs ₹ 6,468.15 Lakhs, and ₹ 4,837.61 Lakhs which, constituted 79.14%, 63.97%, 66.72%, and 76.90% of our revenue from operations for such periods. While we are not dependent on any single raw material supplier, raw material supply and pricing can be volatile due to a number of factors beyond our control, including global demand and supply, transportation and labour costs, labour unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and any unanticipated variation in any of these factors could have a material adverse effect on our operations. As a result, the success of our business is significantly dependent on maintaining good relationships with our raw material suppliers. While we have not faced any disruption in supply of raw material from our suppliers in past, we cannot assure you that we will continue to enjoy undisrupted relationships with our suppliers in the future. If we are unable to obtain adequate supplies of raw material in a timely manner or on commercially acceptable terms, or if there are significant increases in the prices of the raw materials, our business and results of operations may be materially and adversely affected.

Any increase in prices of raw materials could have an impact on our working capital as we would require additional funds to procure the necessary raw materials at higher prices. As a result, we may be required to allocate a larger portion of our working capital towards purchasing raw materials to maintain our production levels. This increased allocation towards purchase can potentially strain our working capital availability.

5. *Our inability to collect receivables and default in payment from our customers could result in the reduction of our profits and affect our cash flows.*

We sell at our standard credit terms with payments ranging generally between 30 to 90 days to our domestic customers depending on the relationship, market reputation, risk associated with such customer. Further in case of export we offer credit period between 30 to 120 days depending on the country where our customer is located. The amount of advance received from our customers is generally in the range of 20% to 30% and the outstanding advance from our customers was ₹ 69.79 Lakhs, ₹ 7.53 Lakhs, ₹ 23.88 Lakhs, and ₹ 19.44 Lakhs for the six months period ended September 2024, FY 2024, FY 2023 and FY 2022 respectively. We generally monitor the ability of our customers to pay these credit arrangements and limit the credit, we extend to what is reasonable based on an evaluation of each customer's financial condition and payment history, we may still experience losses because of a customer being unable to pay. As a result, while we maintain a reasonable allowance for doubtful receivables for potential credit losses based upon our historical trends and other available information, there is a risk that our estimates may not be accurate.

The table set forth below sets forth our trade receivables and receivable turnover days in the periods indicated as well as bad debts written off and disputed trade receivables – which have significant increase in credit risk.

Particulars	For the six months period ended September 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations
Trade Receivables	2,059.18	45.15	2,067.72	20.72%	1,643.72	16.96%	1,308.69	20.80%
Provision for bad and doubtful debts	(5.81)	(0.13%)	(8.73)	(0.09%)	-	-	-	-
Bad debts written off	-	-	18.74	0.19%	-	-	12.46	0.20%

Any increase in our receivable turnover days may negatively affect our business. If we are unable to collect customer receivables or if the provisions for doubtful receivables are inadequate, it could have a material adverse effect on our business, results of operations and financial condition.

Macroeconomic conditions could also result in financial difficulties, including insolvency or bankruptcy, for our customers, and as a result could cause customers to delay payments to us, request modifications to their payment arrangements, that could increase our receivables or affect our working capital requirements, or default on their payment obligations to us. An increase in bad debts or in defaults by our customer, may compel us to utilize greater amounts of our operating working capital and result in increased interest costs, thereby adversely affecting our results of operations and cash flows.

6. We have significant working capital requirements. If we are unable to borrow or raise additional financing or furnish bank guarantees or performance bank guarantees in future, it would adversely impact our business, cash flows and results of operations.

Our business requires significant working capital in connection with manufacturing of our products, financing inventory, day-to-day operations, amongst other purposes which may be adversely affected in case there is any change in terms of credit or payment. The table below shows the net working capital requirements of our Company for the six months period ended September 30, 2024, FY 2024, FY 2023 and FY 2022 respectively

Particulars	As at six months period ended September 30, 2024	As at March 31, 2024	As at March 31, 2023	As at March 31, 2022
Net Working Capital Requirements (₹ in lakhs)	2,620.15	2,280.09	1,481.70	1,509.30
Net Working Capital as a % of revenue from operation	57.45%	22.85%	15.28%	23.99%

Delays in payment from our existing customers or any increase in inventory and work in progress and/or accelerated payments to suppliers, could adversely affect our working capital, lower our cash flows and materially increase the amount of working capital requirements. Accordingly, we may require additional capital or financing from time to time to meet our working capital requirements.

As on September 30, 2024, our borrowings were ₹ 202.47 Lakhs as per the restated financial statement. While we have the capacity to take on financial leverage, our ability to obtain financing is subject to a variety of uncertainties, including our financial condition, results of operations, cash flows and liquidity of the domestic and international capital and lending markets. In addition, our loan agreements may contain financial covenants that restrict our ability to incur additional indebtedness without our lender consent. Any indebtedness that we may incur in the future may also contain operating and financing covenants that could be restrictive. Further, financing may not be available in a timely manner or in amounts or on terms acceptable to us, or at all. If we are required to raise equity financing, this could result in dilution to our Shareholders. Our Company has availed unsecured loans, there is a possibility that such loans could be recalled by the lender at any time. If any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all.

While we have not defaulted in the payment of any of our borrowings including bank guarantees and performance bank guarantee as on the date of this RHP, we cannot assure you that we will not default in future. Further, our

Promoters, Bipin Sanghvi, Hardik Sanghvi and Swagat Sanghvi have provided personal guarantees to secure our existing borrowings which are continuing and are in force as on the date of Prospectus. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal or corporate guarantees provided by our Promoters. Further, continued increase in our working capital requirements may have an adverse effect on our financial condition and results of operations. Management of our working capital requirements involves the timely payment of, or rolling over of, our short-term indebtedness and securing new and additional loans on acceptable terms, or re-negotiation of our payment terms for, our trade payables, collection of trade receivables and preparing and following accurate and feasible budgets for our business operations. If we are unable to manage our working capital requirements, our business, results of operations and financial condition could be materially and adversely affected.

7. *We are dependent on limited number of suppliers for our raw materials required in our operations. Further, our top 10 (ten) suppliers constituted amounting ₹2354.20 Lakhs, ₹4,948.28 Lakhs, ₹3,998.30 Lakhs, ₹2,800.64 Lakhs representing 68.36%, 71.81%, 64.36%, and 57.08%, respectively of total purchases during the six months period ended September 30, 2024, Fiscal 2024, Fiscal 2023, and Fiscal 2022 respectively. Our business is dependent on our continuing relationships with our suppliers and any deterioration in our relations with any of them could materially and adversely affect our business, results of operations, cash flows and financial condition.*

The following table sets forth details of our supplier concentration (by value of raw materials purchased) during six months period ended September 30, 2024, Fiscal 2024, Fiscal 2023 and Fiscal 2022 respectively:

(₹ in Lakhs unless otherwise stated)

Particulars	During the six months period ended September 30, 2024	Fiscal 2024	Fiscal 2023	Fiscal 2022

% to the Purchase for the year	68.36%	71.81%	64.36%	57.08%

**The supplier's names have not been disclosed due to non-receipt of consent.*

Our ability to remain competitive, maintain costs and profitability depends, in part, on our ability to source and maintain a stable and sufficient supply of raw materials at acceptable prices. Our major raw materials include copper-coated wire, MS Strips, MS wire, SS strip, SS wire, nickel wire, ferro-alloy powder, etc. For further information, to please refer chapter titled “**Business Overview**” beginning on page 143 of this Prospectus. We depend on external suppliers for all the raw materials required and typically purchase raw materials on a purchase order basis and place such orders with them in advance based on our requirements. As a result, the success of our business is significantly dependent on maintaining good relationships with our raw material suppliers. The absence of long-term supply contracts subjects us to risks such as price volatility caused by various factors viz. commodity market fluctuations, currency fluctuations, climatic and environmental conditions, transportation cost, changes in domestic as well as international government policies, regulatory changes and trade sanctions. While we purchase majority of our raw materials from the domestic market we also import some of our raw materials from countries such as China, Australia, Sri Lanka etc. As a result, we continue to remain susceptible to the risks arising out of foreign exchange rate fluctuations as well as import duties, which could result in a decline in our operating margins. The details of our raw material consumption for indigenous and imported raw material are as detailed herein below:

Raw material/Components Consumables	For the six months period ended September 30, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amount (₹ in lakhs)	% of revenue from operation	Amount (₹ in lakhs)	% of revenue from operation	Amount (₹ in lakhs)	% of revenue from operation	Amount (₹ in lakhs)	% of revenue from operation
Indigenous	3,316.51	72.72%	6,821.10	68.36%	6,083.39	62.75%	4,713.32	74.92%
Imported	127.35	2.79%	69.24	0.69%	129.12	1.33%	193.99	3.08%
Total	3,443.85	75.51%	6,890.34	69.05%	6,212.51	64.09%	4,907.31	78.01%

We do not have any long-term contracts with these suppliers and conduct our business with these suppliers on the basis of our general experience of their (i) competitive pricing, (ii) favourable delivery terms, and (iii) long standing

business relations. There is no assurance that, in future we will be able to broaden our supplier base or be able to conduct business with our suppliers on favourable terms to procure raw materials. There can be no assurance that in future we will be able to procure the required quantities and quality of raw materials commensurate with our requirements. There can also be no assurance that a particular supplier will continue to supply us with raw materials in the future. Any delay in supplying finished products to customers in accordance with the terms and conditions of the purchase orders, such as delivery within a specified time, as a result of delayed raw material supply, could result in the customer refusing to accept our products, which may have an adverse effect on our business and reputation. If we cannot fully offset the increase in raw material prices with increase in the prices for our products, we will experience lower profit margins, which in turn may have a material adverse effect on our results of operations, financial condition and ultimately lead to a liquidity crunch. In the absence of such contracts, we are also exposed to the risk of unavailability of raw materials in desired quantities and qualities, in a timely manner.

Further, as we generally receive purchase orders for the supply of our products to customers, we rely on historical trends and other indicators to purchase the required quantities of raw materials. We, therefore, run the risk of purchasing more raw materials than necessary, which could expose us to risks associated with prolonged storage of some of these materials, and materially affect our results of operations. In addition, if all or a significant number of our suppliers for any particular raw material are unable or unwilling to meet our requirements or if our estimates fall short of the demand, we could suffer shortages or significant cost increases. Continued supply disruptions could exert pressure on our costs, and we cannot assure you that all or part of any increased costs can be passed along to our customers in a timely manner or at all, which could negatively affect our business, overall profitability and financial performance.

However, there has not been any such instance of disruption of supply of raw materials in last three financial years having material impact either on operation or financials of company.

8. We derive a significant portion of our revenue from a few customers and the loss of one or more such customers, the deterioration of their financial condition or prospects, or a reduction in their demand for our products may adversely affect our business, results of operations, financial condition and cash flows.

We are dependent on a limited number of customers for a significant portion of our revenues. We typically do not have firm commitment in the form of long-term supply agreements with most of our key customers and instead rely on purchase and other terms of our sales of products. We do not typically have exclusivity arrangements with most of our customers. While we have developed long-term relationships with certain of our customers, there is no commitment on the part of our key customers to continue to place new purchase orders with us and as a result, our cash flow and consequent revenue may fluctuate significantly from time to time. Further, we may not find any other customers for the surplus or excess capacity, in which case we may be forced to incur a loss. The loss of one or more of these significant customers or a significant decrease in business from any such key customer may materially and adversely affect our business, results of operations and financial condition.

The table below sets forth the revenue derived from our top 1, top 5 and top 10 customers for the fiscals indicated:

(₹ in lakhs unless otherwise stated)

Particulars	For the six months period ended September 30, 2024	Fiscal 2024	Fiscal 2023	Fiscal 2022
Top 1 customer	485.49	872.94	1,094.33	732.71
% of revenue from operation	10.65%	8.75%	11.29%	11.65%
Top 5 customers	1,474.35	2,858.27	2,867.65	2,313.51
% of revenue from operation	32.33%	28.64%	29.58%	36.77%
Top 10 customers	2,181.92	4,409.79	4,331.19	3,359.94
% of revenue from operation	47.84%	44.19%	44.68%	53.40%

**Our Company has requested our customers to provide their consent to disclose their name in the Offer Documents through an email. Thus, name of the customers is not disclosed due to non-receipt of the consent.*

The deterioration of the financial condition or business prospects of our significant customers could reduce their requirement of our products and result in a significant decrease in the revenues we derive from these customers. We cannot assure you that we will be able to maintain historic levels of business from our significant customers, or that we will be able to significantly reduce customer concentration in the future. The loss of one or more of our significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows

9. Commercialization and market development of new products may take longer time than expected and / or may involve unforeseen business risks. Our inability to successfully diversify our product offerings of may adversely affect our growth and negatively impact our profitability.

We manufacture of welding consumables such as, welding electrodes, flux cored wire, MIG/TIG wires, which finds its application in the welding of tanks, boilers, heavy structures, beams, pipes, cylinders, pressure vessels, etc. which are used in industries like railways, roadways, airport infrastructure, refineries, shipyards, mines, sugar industries, telecom industries, thermal power stations, PEB sectors, etc. Further, our Company is also engaged in the business of trading of ancillary/incidental products like wheels, electro slag, welding flux cored wire, electro slag strip cladding, saw flux and TIG /MIG wires.

We believe that we share a good client relationship with our customers and we receive the majority of our business from repetitive clients. The key factor in our business is the client/consultant certification given the critical application in which our products are used. For instances our products are certified by the American Bureau of Shipping (“ABS”), Indian Boilers Regulation (“IBR”), Bureau of Indian Standard (“BIS”) etc. Further, based on client requirements, the inspection and testing of the quality of our products are also outsourced to inspection agencies that are NABL-accredited laboratories.

We firmly believe that our industry is dependent on innovation and development and hence, as our business strategy we focus on research and development. Our future results of operations depend, to a significant degree, on our ability to successfully develop new products and continue our product portfolio expansion in a timely and cost-effective manner. Further, as part of our business strategies, we intend to further diversify our product portfolio by entering into new product value chains. In addition, we intend to expand our capacities in existing products as well as expanding and strengthening our research capabilities in order to ensure rapid product innovation. Innovation continues to be the key determinant for our success. The development and commercialisation of new products are complex, time-consuming, costly and involves a high degree of business risk. We may be unable to successfully create these new products or encounter unexpected delays in the launch of these products and even if launched as planned, such products may not perform as we expect or address changing consumer trends or emerging industry standards. Our Company has not introduced any new products in the preceding three fiscals.

Any rapid change in the expectations of our dealers and end customers in our business on account of changes in technology or introduction of new alternate products could adversely affect our business, results of operations and financial condition. Further, there can be no assurance that our newly developed products will achieve commercial success. Even if such products can be successfully commercialized, there is no guarantee that they will be accepted widely by the market. In addition, we cannot assure you that our existing or potential competitors will not develop products which are similar or superior to our products. It is often difficult to project the time frame for developing new products and the duration of market demand for these products, there is a substantial risk that we may have to abandon a potential product that is no longer commercially viable, even after we have invested significant resources in the research and development of such product. Venturing into a new product line may require methods of operations and marketing and financial strategies, different from those currently employed in our Company. We cannot assure you that we will be able to successfully develop our new product lines. Further, we will be subject to the risks generally associated with new product introductions and applications, including unproven know-how, unreliable technology, inexperienced staff, and delays in product development and possible defects in products.

10. If we fail to manage our growth effectively, we may be unable to execute our business plan or maintain high levels of service and satisfaction, and our business, results of operations, cash flows and financial condition could be adversely affected.

We have experienced significant growth in our revenue from operations and profitability in the last three Fiscals and anticipate that we will continue to potentially grow, expand into new geographies and take advantage of market opportunities. Our revenue from operations has grown from ₹6,920.97 lakhs in Fiscal 2022 to ₹ 9,978.75 lakhs in Fiscal 2024. Our PAT has grown from ₹ 212.13 lakhs in Fiscal 2022 to ₹ 1,192.63 lakhs in Fiscal 2024.

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy includes growing our product portfolio, strengthening our brand, deepening our penetration in existing markets and expanding our presence in select new territories and expanding our manufacturing capacities. For further information, see “**Business Overview**” on page 143 of this Prospectus.

Many factors may contribute to a decline in our revenue growth rates, including increased competition, slowing demand for our product from existing and new customers, reduced market acceptance, inability to attract new customers, general economic conditions, government actions and policies, a failure by us to continue capitalizing on growth opportunities, changes in the regulatory framework, availability of an alternate to our product, non-availability of raw materials at competitive pricing, inability to procure raw materials from new sources and the maturation of our business, among others. We cannot assure you that our current and planned systems, policies,

procedures and controls, personnel and third-party relationships will be adequate to support our future operations. Our inability to effectively manage any of these issues may adversely affect our business growth and, as a result, impact our business, financial condition, results of operations and prospects.

To manage operations and personnel growth, we will need to continue to grow and improve our operational, financial, and management controls and our reporting systems and procedures. Failure to manage our anticipated growth and organizational changes in a manner that preserves the key aspects of our culture could reduce our ability to recruit and retain personnel, innovate, operate effectively, and execute on our business strategy, potentially adversely affecting our business, results of operations, cash flows and financial condition.

We will need to adapt and upgrade our controls, policies, procedures and overall operations to accommodate our growing operations and supporting personnel. Moreover, the speed with which our internal controls and procedures are implemented or adapted to changing regulatory or commercial requirements may be inadequate to ensure full and immediate compliance, leaving us vulnerable to inconsistencies and failures that may have a material adverse effect on our business, results of operations, cash flows and financial condition.

In addition, there may be delays in the anticipated timing of activities related to such growth initiatives, strategies and operating plans; increased difficulty and cost in implementing these efforts; and the incurrence of other unexpected costs associated with operating the business. Any of these factors could adversely impact our results of operations. If, for any reason, the benefits we realize are less than our estimates or the implementation of these growth initiatives, strategies and operating plans adversely affect our operations or cost more or take longer to effectuate than we expect, or if our assumptions prove inaccurate, our results of operations may be materially adversely affected.

11. A significant portion of our domestic revenues are derived from the western and central zone and any adverse developments in this market could adversely affect our business.

Set forth below is certain information on our geography-wise domestic revenue from operations on the Restated Financial Statement for the periods indicated:

Zone	For the six months period ended September 30, 2024		March 31, 2024		March 31, 2023		March 31, 2022	
	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations

Total	3,894.65	85.40%	8,537.45	85.56%	7,981.66	82.34%	4,606.27	73.22%

For further information, please refer to chapter titled **“Business Overview”** beginning on page 143 of this Prospectus. We have historically derived a significant portion of our revenue from sales in the western zone. For the six months period ended September 30, 2024, Fiscal 2024, 2023, and 2022 the revenue generated from sales in the western and central zone cumulatively amounting ₹ 2,950.80 Lakhs, ₹ 6,268.38 Lakhs, ₹ 6,096.25 Lakhs and ₹ 3,787.34 Lakhs represented 64.70%, 62.82%, 62.89% and 60.20%, respectively, of our revenue from operations. Accordingly, any materially adverse social, political or economic development, natural calamities, civil disruptions, regulatory developments or changes in the policies of the state or local government in this region could adversely affect our manufacturing and distribution activities, result in modification of our business strategy or require us to incur significant capital expenditure, which will in turn have a material adverse effect on our business, financial condition, results of operations, and cash flows. Further, our sales from this region may decline as a result of increased competition, regulatory action, pricing pressures, fluctuations in the demand for or supply of our products or services, or the outbreak of an infectious disease such as COVID-19. Our failure to effectively react to these situations or to successfully introduce new products or services in these markets could adversely affect our business, prospects, results of operations, financial condition, and cash flows. The occurrence of, or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects.

12. Under-utilization of our manufacturing capacities and an inability to effectively utilize our expanded manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.

The success of any capacity expansion and expected return on investment on capital expenditure is subject to, among other factors, the ability to procure requisite regulatory approvals in a timely manner; recruit and ensure satisfactory performance of personnel to further grow our business; and the ability to absorb additional infrastructure costs and develop new expertise. Our ability to maintain our profitability depends on our ability to optimize the product mix to support high-margin products and products with consistent long-term demand and the demand and supply balance of our products in the principal and target markets. In particular, the level of our capacity utilization can impact our operating results. Capacity utilization is also affected by our product mix and the demand and supply balance.

Our overall capacity utilization for Welding Electrodes and Flux Cored wire are as follows:

For the six months period ended September 30, 2024 *					
Product	Location	Total Installed Capacity	Units	Qty Produced	Utilization %
Welding Electrodes	Bhilad	10800	MT	1951	36.13
Flux Cored Wire	Bhilad	7200	MT	1500	41.67

For the Financial Year Ended March 31, 2024 *

Welding Electrodes	Bhilad	10800	MT	3459	32.02%
Flux Cored Wire	Bhilad	7200	MT	2879	39.99%

For the Financial Year Ended March 31, 2023*					
Product	Location	Total Installed Capacity	Units	Qty Produced	Utilization %
Welding Electrodes	Bhilad	10800	MT	2944	27.26%
Flux Cored Wire	Bhilad	6480	MT	2624	40.49%

For the Financial Year Ended March 31, 2022*

*As certified by Shivabhai Patel, Independent Chartered Engineers vide their certificate dated December 04, 2024.

For further information, please refer to chapter titled “**Business Overview-capacity and capacity utilization**” beginning on page 152 of this Prospectus. As regards the above, there has been an overall increase in capacity utilization has increased but due to restrictions we are unable to utilize the full capacity which is and shall hamper our ability to generate revenue.

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at our manufacturing facility, the availability of raw materials, industry/ market conditions, as well as by the product requirements of, and procurement practice followed by, our distributors. In the event we face prolonged disruptions at our facilities including due to interruptions in the supply of water, electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our current manufacturing facility, resulting in operational inefficiencies which could have a material adverse effect on our business and financial condition. Our proposed expansion plans are based on demand forecasts that are subject to various assumptions including product trends in the industry and management estimates that are based on prevailing economic conditions. Adequate utilization of our expanded capacities is therefore subject to various factors beyond our control and in case of oversupply in the industry or lack of demand, we may not be able to utilize our expanded capacities efficiently. The success of any capacity expansion and expected return on investment on capital invested is subject to, among other factors, the ability to procure requisite regulatory approvals in a timely manner; recruit and ensure satisfactory performance of personnel to further grow our business; and the ability to absorb additional infrastructure costs and develop new expertise and utilize the expanded capacities as anticipated. Please also refer to

chapter titled **“Risk Factor no. 3. We may face several risks associated with the proposed expansion in our manufacturing facility, which could hamper our growth, prospects, cash flows and business and financial condition”** beginning on page 32 of this Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations.

We cannot assure you that our net cash flows will be positive in the future. Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, prospects, results of operations and financial condition may be materially and adversely affected. For further details, please refer to chapter titled “*Restated Financial Statements*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on pages 201 and 240 of this Prospectus respectively.

We have conducted an extensive search of our records with the RoC, both physically and on the MCA portal, and in this regard have obtained a certificate dated July 17, 2024 from Riddhi Shah, Practicing Company Secretary. However, we have not been able to retrieve the form filing, and accordingly, have relied on documents we have relied on alternative documents such as board resolutions and share transfer registers maintained by our Company for transfers made to and by our Promoters. Further, we have also intimated the RoC with respect to the untraceable attachment by way of our letter dated July 31, 2024. Although no actions have been initiated or pending against us in relation to such untraceable record, as on the date of this Prospectus, if we are subject to any such liability, it may have an adverse effect on our reputation, and results of operations

For further details, please refer to chapter titled “*Capital Structure*” beginning on page 88 of this Prospectus. We cannot assure you that we will not be subject to legal proceedings, regulatory action or penalties imposed by statutory or regulatory authorities in this respect, which may adversely affect our business, financial condition, results of operations and reputation.

There have been certain discrepancies in relation to statutory filings required to be made by us with the RoC under applicable laws, as well as certain other non-compliances incurred by us under the Companies Act details of which are provided hereunder:

- There has been a typography error in the memorandum of association filed with the RoC at the time of incorporation where in the face value of the share of ₹.10/- each was wrongly mentioned as ₹.100/-. However, the same was corrected while filling amendment to MOA with ROC dated July 05, 2000.
- There was inadvertent error in Form 2 filed with the RoC for allotment dated March 31, 2006 and January 5, 2006 wherein the effect of post issue paid up capital was interchange provided in the both resolution and Form 2.
- There has been a typography error in the return of allotment filed by our Company with the RoC with regard to the date of allotment which has been erroneously stated in the Form 2 as March 31, 2012 instead of July 24, 2012.
- Our Company has wrongly reported the registered office address as 72 B, Bombay Talkies Compound, S. V. Road Malad West, Mumbai, Maharashtra, India, 400064 instead of 203-205, Business Classic, Chincholi Bunder Road, Malad west Mumbai- 400064 in the form during digitization of the records in the Financial year 2006-07. However, our Company has updated our registered office while filing necessary form with the RoC.

There have delays in filing forms with the RoC For instance 1) Form No 20B for Annual Return 2005-06, 2007-08, 2008-09, 2009-10 2) Form 23AC and Form 23ACA for Financial year 2005-06, 2006-07, 2007-08, 2008-09, 2009-10 3) Form 66 for FY 2005-06, 2006-07, 2007-08, 2008-09, 2009-10 3) Form 2 Return of allotment dated January 05, 2006 and March 31, 2006 4) Form 23 and Form 25C for appointing managing director and whole time director and many more were filed by payment of additional fees.

Further during the Financial year 2014-15, our Directors has not disclosed their interest in first board meeting as per provision of the section 184 of the Companies Act, 2013.

Although no actions have been initiated or pending against us in relation to such non-compliance, as on the date of this Prospectus, if we are subject to any such liability, it may have an adverse effect on our reputation, and results of operations. Further, there can be no assurance that there will be no non-compliances in the future and our Company will not be subject to adverse actions by the authorities

Although, no regulatory action, fine or penalty has been taken/ levied on our Company for the abovementioned purported default / non-compliance, however, it cannot be assured that no such regulatory action, fine or penalty will be taken/ levied in the future. Further, we cannot assure you that such non-compliances will not occur in the future. Therefore, if the concerned authorities impose monetary penalties on us or take certain punitive actions against our Company or its directors/ officers in relation to the same, our business and financial condition could be adversely affected. Any such proceeding or action which may be initiated in the future may divert management time and attention and may subject us to further regulatory consequences (including penalty or action) which may have an adverse effect on our business, finance and results of operations.

18. We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.

The logo ‘’ and the word ‘ROYALARC’ registered under class 9 which we use has been transferred to our Company by our Promoter, Bipin Sanghvi. Further, the logo ‘’, under classes 7 and 8 under the Trade Marks Act, 1999 has been assigned to our Company by our Promoter Tarulata Bipinbhai Sanghvi vide deed of assignment, however, the same is not been reflected on the trademarks site. Any failure to register or renew registration of our registered trademark may affect our right to use such trademark in future. Further, our efforts to protect our intellectual property in India and abroad may not be adequate and any third-party claim on any of our unprotected intellectual property may lead to erosion of our business value and our reputation, which could adversely affect our operations. Third parties may also infringe or copy our registered trade name in India and abroad which has been registered by us in India. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks in India and abroad.

Furthermore, we cannot assure you that such trade name will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source. Any damage to our brand name, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position in India and abroad.

Further, the logo ‘’, under classes 6, under the Trade Marks Act, 1999 has been assigned to our Company by our Promoter Tarulata Bipinbhai Sanghvi. However, logo ‘’ under class 6 is opposed as on date. Pending the registration of the trademark, any other vendor in the similar line of business as ours may use the above-mentioned trademarks and we may have a lesser recourse to initiate legal proceedings to protect our intellectual property. Further, the applications for the registration of these trademarks may be opposed by third parties, and we may have to incur significant cost in relation to these oppositions. In the event, we are not able to obtain registrations due to opposition by third parties or if any injunctive or other adverse order is issued against us in respect of the trademark may amount to our inability to use such trademarks and / or avail the legal protection or prevent unauthorized use of such trademarks by third parties. Any such event may adversely affect our goodwill and business. For further details, please refer to chapter titled “*Business Overview - Intellectual Property*” and “*Government and Other Statutory Approvals-VI. 19. Our operations are labour intensive and our manufacturing operations may be subject to unionization, work stoppages or increased labour costs, which could adversely affect our business and results of operations.

Our manufacturing activities are labour intensive and expose us to the risk of various labour related issues. Whilst we have not faced any strike by our workforce, we cannot assure you that we will not be subject to work stoppages, strikes, lockouts or other types of conflicts with our employees or contract workers in the future. The success of our operations depends on availability of labor and maintaining a good relationship with our workforce. As of December 31, 2024, we employed of 144 permanent employees.

We do not have any trade union registered under the Trade Unions Act, 1926. In the past three years, we have not experienced any labour dispute except the ongoing dispute with labour, details whereof have been disclosed in

chapter titled **“Outstanding Litigations and Material Developments”** beginning on page 257 of this Prospectus. We do not have any formal policy for redressal of labour disputes. Shortage of skilled/ unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. There can be no assurance that we will not experience labour unrest in the future, which may delay or disrupt our operations. In the event of any prolonged delay or disruption of our business, results of operations and financial condition could be materially and adversely affected.

Our country has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits.

Consequently, the audited report for the said fiscal year has not been issued by its auditors, and the financial statements have not been filed within the statutory timelines required under the provisions of the Companies Act, 2013, and other applicable laws and regulations.

This delay in submitting financial statements with the Registrar of Companies (RoC) constitutes non-compliance with the provisions of the Companies Act, 2013, and the rules framed thereunder. Such non-compliance may attract penalties and/or punishments for the company and its officers-in-default. It could also have broader implications for the business, financial condition, cash flows, and results of operations of Royal Arc Infrastructure Private Limited.

Additionally, this non-compliance may result in the deactivation of the Directors Identification Number (DIN) of the directors serving on the board of Royal Arc Infrastructure Private Limited if they do not file financial statement or annual returns for continuous period for three financial years. Since Mr. Bipin Sanghvi is a director on the boards of both Royal Arc Infrastructure Private Limited and our Company, the deactivation of his DIN in his capacity as a director of Royal Arc Infrastructure Private Limited would disqualify him from continuing as a director of our Company. Such a situation could materially impact our business operations, decision-making processes, and corporate governance, ultimately may have an adverse effect on the financial condition, cash flows, and results of operations of our Company.

Moreover, the proceedings related to such non-compliance could divert the time and attention of our Promoter and Managing Director, Bipin Sanghvi, potentially consuming financial resources in his defence or resolution of the matter. While we expect Royal Arc Infrastructure Private Limited to address the pending issues and ensure the active status of its directors' DINs, we cannot provide assurance of the same. Any such eventuality could significantly affect our board composition, operational efficiency, and overall business performance.

The non-renewal of any of the leave and license agreements may result in temporary disruption in the functioning of our offices. In India, these include the Factories Act, 1948, Contract Labour (Regulation and Abolition) Act, 1970, Payment of Wages Act, 1936, etc. A failure by us or our contractors to comply with the relevant labour regulations, could lead to enforced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our

new products. We may be involved in future litigation or other proceedings or be held liable in any litigation or proceedings including in relation to labour, safety, health and environmental matters, the costs of which may be significant. Environmental laws and regulations in India are becoming more stringent and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment and emissions management.

As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. In addition, we could incur substantial costs, our products could be restricted from entering certain markets and we could face other sanctions, if we were to violate or become liable under environmental laws or if our products become non-compliant with applicable regulations. Our potential exposure includes fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. The amount and timing of costs under environmental laws are difficult to predict.

We rely on protections available under Indian law, which may not be adequate to prevent unauthorized use of our intellectual property by third parties. There has not been any instances unauthorized use of our intellectual property by third parties in the last 3 years. We cannot assure you that any instances will not arise in future. In addition, any adverse outcome in relation to any future proceedings, may have an adverse effect on our business, results of operations, financial condition and cash flows. 27. Restrictions on import of raw materials may impact our business and results of operations.

We currently import some portion of our raw materials from China. The raw material imports are regulated by certain specific laws and regulations that permit concerned authorities to stop any import if it is deemed that the goods proposed to be imported may be hazardous. While the raw materials we import may not be hazardous in nature, we cannot assure you that such regulations will not be made applicable to us or that such regulations will not evolve into more stringent regulations, which would place onerous requirements on us and consequently restrict our ability to import raw materials. While we have not in the recent past experienced any challenges in importing such materials, we cannot assure you that we will not experience any such challenges in the future. For the six months period ended September 30, 2024, Fiscal 2024, Fiscal 2023 and Fiscals 2022 our purchase of imported raw materials on CIF basis amounts to ₹ 127.35 Lakhs, ₹ 69.24 Lakhs, ₹ 129.12 Lakhs and ₹ 193.99 Lakhs, representing 3.70%, 1.00%, 2.08% and 3.95% respectively, of our total purchase on restated financial statement. We are unable to assure you that such regulations would not be made more stringent which would consequently restrict our ability to import raw materials from other jurisdictions. Any restriction on import of raw materials could have an adverse effect on our ability to deliver products to our customers, business and results of operations.

Any defect in our products could result in cancellation of our orders for manufacturing and selling the products. In case our products are found to be defective, the same could result in a claim against us for damages. Although, we attempt to maintain quality standards, and although there have not been any instances of cancellation of our orders due to defects, we cannot assure that all our products would be of uniform quality. “In the event the products sold by us are defective or substandard for any reason, including due to human errors at any stage of manufacturing, our customers may pursue claims or actions against us within the warranty period, which could materially and adversely affect our business, financial conditions and results of operations. However, there has not been any such major instance of customer claims or actions against company in past three financial years having material impact either on operation or financials of our Company.

29. We operate in a competitive and fragmented industry with low barriers to entry and may be unable to compete with a range of unorganized sector.

In the dynamic landscape of the engineering business, one of the formidable challenges arises from competition in the unorganized sector. We operate in the copper coated wire, MS Strips, MS wire, SS strip, SS wire, nickel wire, ferro alloy powder, etc which is competitive and fragmented and we compete with a range of unorganized players, at the national and regional level. Further, while we have an expanding portfolio of products, our competitors may have the advantage of focusing on concentrated products. Further, we compete against established players also, which may have greater access to financial, technical and marketing resources and expertise available to them than us in the products and services in which we compete against them.

Further, industry consolidation may affect competition by creating larger, more homogeneous and potentially stronger competitors in the markets in which we compete. Our competitors may further affect our business by entering into exclusive arrangements with our existing or potential clients. There can be no assurance that we will be able to compete successfully against such competitors or that we will not lose our key core employees, associates or clients to such competitors. Additionally, our ability to compete also depends in part on factors outside our control, such as the availability of skilled resources, pricing pressures in the staffing industry and the extent of our competitors' responsiveness to their client's needs. Our continued success depends on our ability to compete effectively against our existing and future competitors. While our products are subject to quality check by our customers and empanelment as their vendor, which results in some entry barriers, the potential entry of new competitors, given the relatively low entry barriers in the industry where we operate, our ability to retain our existing clients and to attract new clients is critical to our continued success. As a result, there can be no assurance that we will not encounter increased competition in the future nor can there be any assurance that we will, in light of competitive pressures, be able to effectively compete with our competition in the various product and service segments we operate in, whether on the basis of pricing, quality or range of services or otherwise, which could have material adverse effect on our business, results of operations and financial condition.

30. We are dependent on third-party transportation providers for the supply of raw materials and delivery of our finished products and any failure to maintain a continuous supply of raw materials or to deliver our products to our customers in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

As a manufacturing business, our success depends on the smooth supply and transport of the various raw materials required for our manufacturing facility and of our products from our manufacturing facility to our customers, or delivery points if any, which are subject to various uncertainties and risks. We transport our raw materials and our finished products by road and sea. We use third-party freight and transportation providers for the delivery of our products. The below table provides details of the transport cost incurred by our Company:

Particulars	For the six months period ended September 30, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations
Transport Charges	81.91	1.80%	152.40	1.53%	203.34	2.10%	295.00	4.69%

We do not have formal contractual relationships with such logistic companies and freight forwarders, particularly in the export markets. We also have a marine open insurance policy to cover any damage to our products during transit. Transportation strikes, if any, could have an adverse effect on supplies and deliveries to and from our customer and suppliers. Further, on account of the COVID-19 pandemic, our manufacturing operations were shut down and our third-party transportation providers' operations were also closed during the lockdown imposed by the Government.

Further, raw materials and finished products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be a delay in delivery of raw materials and products which may also affect our business and results of operations negatively. A failure to maintain a continuous supply of raw materials or to deliver our products to our customers in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations. Any compensation received from insurers or third-party transportation providers may be insufficient to cover the cost of any delays and will not repair damage to our relationships with our affected customers. We may also be affected by an increase in fuel costs, as it will have a corresponding impact on freight charges levied by our third-party transportation providers. This could require us to expend considerable resources in addressing our distribution requirements, including by way of absorbing these excess freight charges to maintain our selling price, which could adversely affect our results of operations or passing these charges on to our customers, which could adversely affect demand for our products.

31. Our overall margins may fluctuate as a result of the product manufactured by us.

Our overall margins may fluctuate depending on the product manufactured. For example, the gross margin of any given product could depend on the total volume manufactured, complexity of manufacturing processes, technology deployed, and other factors. As a result, a change in product mix may decrease the gross margins and operating margins of our Company, which could have a material adverse effect on our business, financial condition and results of operations. Our ability to maintain our profitability depends on our ability to optimize the product mix to support high-margin products and products with consistent long-term demand and the demand and supply balance of our products in the principal and target markets.

Furthermore, our different lines of business present different levels of profitability and opportunity for growth. If we fail to increase or maintain the proportion of certain products that are profitable in our portfolio this may lead to a reduction in our profitability. If we are not able to attract a sufficient market share of products in growing sectors, we may also not be able to continue to grow our business which may lead to a loss of our market position and therefore a reduction in GDPI.

32. *Unplanned slowdowns or shutdowns of our manufacturing operations could have an adverse effect on our business, results of operations, financial condition, cash flows and future prospects.*

Our business is dependent upon our ability to efficiently manage our manufacturing facility, which is subject to various operating risks, including the productivity of our workforce, increase in employee costs, compliance with regulatory requirements, and circumstances beyond our control, such as the breakdown and failure of equipment or industrial accidents, severe weather conditions, natural disasters and infectious disease outbreaks such as the COVID-19 pandemic. Any malfunction or breakdown of our machinery may require significant repair costs and consequently cause delays in our operations. We may also face protests from local citizens at our existing manufacturing facilities or while setting up new facilities, which may delay or halt our operations. There are no instances of unplanned slowdowns or shutdowns in the manufacturing operations of our Company in the last three Fiscals and in the current Fiscal until the date of this Prospectus, except for instance due to COVID-19.

Our operations also require a significant amount and continuous supply of electricity, and any shortage or non-availability of such utilities may adversely affect our operations. We have significant power requirements and any disruption to power sources could increase our production costs and adversely affect our results of operations. Any interruption in the continuous supply electricity may negatively impact the quality of the final product manufactured by us, which may result in delays in delivery of our products or non-delivery, resulting in loss of revenue and adversely affecting our reputation or customer relationships. A prolonged interruption of electricity supply can also result in manufacturing slowdown or shutdowns, increased costs associated with restarting manufacturing and the loss of manufacturing in progress. The occurrence of any such event in the future could have an adverse effect on our business, results of operations, financial condition, cash flows and future prospects. Our inability to effectively respond to any shutdown or slowdown and rectify any disruption, in a timely manner and at an acceptable cost, could lead to an inability to comply with our customers' requirements and result in us breaching our contractual obligations.

33. *Our funding requirements and the proposed deployment of Net Proceeds are based on management estimates and have not been appraised by any bank or financial institution or any other independent agency and may be subject to change based on various factors, some of which may be beyond our control. We have not entered into any definitive agreements to utilise certain portions of the Net Proceeds of the Offer.*

We intend to use the Net Proceeds for the purposes described in chapter titled "**Objects of the Offer**" beginning on page 103 of this Prospectus. As on the date of this Prospectus, our funding requirements are based on management estimates, current circumstances of our business, the prevailing market condition and other commercial and technical factors and have not been appraised by any bank or financial institution. They are based on current conditions and are subject to change in light of financial condition, business strategy and external factors such as government policies, market conditions, competitive environment and interest or exchange rate fluctuations and other external factors which may not be within the control of our management. While we will use the Net Proceeds for purposes such as part expansion of the manufacturing facility, Funding of working capital requirements of the Company in the manner specified in chapter titled "**Objects of the Offer**" beginning on page 103 of this Prospectus.

Our internal management estimates may exceed fair market value which may require us to reschedule or reallocate our expenditure and may have an adverse impact on our business, financial condition, results of operations and cash flows. We may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in input cost, and other financial and operational factors. Accordingly, prospective investors in the Offer will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to deploy the Net Proceeds in a timely or an efficient manner, it may affect our business and the results of operations.

In accordance with sections 13(8) and 27 of the Companies Act, we cannot change the utilization of the Net Proceeds or the terms of any contract as disclosed in this Prospectus without obtaining the Shareholders' approval through a special resolution. We may not be able to obtain the Shareholders' approval in a timely manner, or at all, in the event we need to make such changes. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations. Further, as required under Section 27 of the Companies Act, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Offer or vary the terms of such contracts, at a price and manner as prescribed by SEBI. The requirement to provide an exit opportunity to such dissenting shareholders may deter our Promoters from agreeing to any changes made to the proposed utilization of the Net Proceeds, even if such change is in our interest. Further, we cannot assure

you that our Promoters will have adequate resources to provide an exit opportunity at the price prescribed by SEBI. For further details on exit opportunity to dissenting shareholders, please see chapter titled **“Objects of the Offer”** on page 103 of this Prospectus. In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, or vary the terms of any contract referred to in this Prospectus, even if such variation is in our interest. This may restrict our ability to respond to any change in our business or financial condition by redeploying the unutilized portion of the Net Proceeds, if any, or varying the terms of any contract, which may adversely affect our business, financial condition, results of operations, cash flows and prospects.

34. Our insurance coverage may not be sufficient or adequate to protect us against all material hazards, which may adversely affect our business, results of operations, financial condition and cash flows.

Our operations are subject to various risks inherent in the manufacturing industry including defects, malfunctions and failures of manufacturing equipment, fire, riots, strikes, explosions, loss-in-transit for our products, accidents and natural disasters. The occurrence of any one of these events may result in our being named as a defendant in lawsuits asserting claims for substantial damages, including for cleanup costs, personal injury and property damage and fines and/ or penalties. We generally perform scheduled and unscheduled maintenance and operating and other asset management services. The manufacturing of products involves handling of certain risky materials which, if not handled properly, can be dangerous. Our insurance may not be adequate to completely cover any or all of our risks and liabilities. There have been no instances in the last three years.

We maintain an amount of insurance protection that we consider adequate including insurance policy covering fire, damage to buildings, plant and machinery, stocks (raw materials and finished goods), vehicles and policy covering damage to goods in transit. We may not have identified every risk and further may not be insured against every risk because such risks are either uninsurable or not insurable on commercially acceptable terms, including operational risk that may occur and the occurrence of an event that causes losses in excess of the limits specified in our policies, or losses arising from events or risks not covered by insurance policies such as COVID-19 and other pandemics, or due to the same being inadequate, could materially harm our cash flows, financial condition and future results of operations. Further, while there has been no past instance of inadequate insurance coverage for any loss, we cannot assure that we will continue to accurately ascertain and maintain adequate insurance for losses that may be incurred in the future. In addition, our insurance coverage expires from time to time. For instance, we had not initiated renewal process for our vehicle insurance but we cannot assure you that such renewal will be granted. We apply for the renewal of our insurance coverage in the normal course of our business but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. Any claim brought against us, with or without merit, could result in reputational damage, and even unsuccessful claims could result in substantial costs and diversion of management resources. A successful claim not fully covered by our insurance could have a negative impact on our reputation, financial condition, and results of operations. For further information on our insurance arrangements, please refer to chapter titled **“Business Overview – Insurance”** beginning on page 163 of this Prospectus.

35. Our Promoters will continue to retain significant shareholding in our Company after the Offer, which will allow it to exercise control over us.

After the completion of the Offer, our Promoters will hold 63.62% of our post paid-up equity shares on a fully diluted basis. Accordingly, post completion of the Offer, our Promoters is expected to retain majority shareholding in our Company will continue to exercise control over our business and all matters requiring shareholders’ approval, including the composition of our Board of Directors, the adoption of amendments to our charter documents, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. There can be no assurance that our Promoters will exercise its rights as a Shareholder to the benefit and best interests of our Company. The interests of our Promoters, as our Company’s significant Shareholder and exercising control over our Company, could be different from the interests of our other Shareholders and their influence may result in change of management or control of our Company, even if such a transaction may not be beneficial to our other Shareholders.

36. Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.

We have not declared dividend in the past. For further information, please refer to chapter titled **“Dividend Policy”** on page 200 beginning of this Prospectus. Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. The declaration and payment of dividends will be recommended by the Board of Directors and approved by the Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act. We may retain all future earnings, if any, for use in the operations and expansion of the business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board in accordance with

the dividend distribution policy as may be adopted by our Board from time to time and will depend on factors that our Board deems relevant, including among others, our Company's profitability, capital requirements, financial commitments and requirements, including business and expansions plans, applicable legal restrictions and any other financing arrangements. We cannot assure you that we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

37. In addition to normal remuneration or benefits and reimbursement of expenses, some of our directors and key managerial personnel are interested in our Company to the extent of their shareholding in our Company.

Our Promoter and Directors may be deemed to be interested in addition to regular remuneration or benefits and reimbursement of expenses from our Company, and such interests are to the extent of the Equity Shares held by them, or their relatives or our Group Entities, and benefits deriving from their directorship and shareholding in our Company. Our Promoter are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Entities. For the payments that are made by our Company to related parties including remuneration to our Directors, please refer to chapter titled "*Summary of the Offer Document – Summary of Related Party Transactions*", "*Our Management*" "*Our Promoter and Promoter Group*" on page 28, 179 and 193 of this Prospectus respectively. Additionally, our Promoters have provided personal guarantee for certain of our borrowings and our business, financial condition, results of operations and prospects may be adversely affected by the revocation of all or any of the guarantees provided by our Promoters in connection with our Company's borrowings. For more information, please refer to chapter titled "*Financial Indebtedness*" beginning on page 255 of this Prospectus.

38. There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until Allotment of Equity Shares pursuant to this Offer.

In accordance with current regulations and circulars issued of SEBI, our Equity Shares are required to be listed on the stock exchanges within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

39. We are exposed to foreign currency exchange rate fluctuations, which may adversely affect our results of operations and cause our quarterly results to fluctuate significantly.

Our financial statements are prepared in Indian Rupees. However, our sales from exports and a portion of our raw materials expenditures are denominated in foreign currencies. Accordingly, we have currency exposures relating to buying and selling in currencies other than in Indian Rupees.

Our revenues from exports, cost of imported raw materials and foreign exchange gain /(loss) for the relevant periods was as below

Particulars	For the six months period ended September 30, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations
Revenue from exports	665.83	14.60%	1,441.30	14.44%	1,712.36	17.66%	1,684.71	26.78%
Cost of imported raw material/ Components Consumables	127.35	2.79%	69.24	0.69%	129.12	1.33%	193.99	3.08%
Net Foreign Exchange Gain / (Loss)	12.22	0.27%	20.12	0.20%	60.73	0.63%	25.64	0.41%

Therefore, changes in the relevant exchange rates could also affect sales, operating results and assets and liabilities reported in Indian Rupees as part of our financial statements. We face foreign exchange rate risk as certain portion of

our revenues are denominated in a currency other than the Indian Rupee. Because of our foreign currency exposure, exchange rate fluctuations between the Indian Rupee and foreign currencies, can have a material impact on our results of operations, cash flows and financial condition. These gains/losses were related to instances where the market exchange rate at the time of transaction was in our favour or against us as compared to the rates we had applied when the transactions were accounted. Our company currently does not engage in any kind of hedging contracts for exchange rate fluctuations, we may enter into the same in future which may or may not adequately cover the potential loss that may arise as a result of such foreign exchange transactions. Moreover, the hedges may not cover all such exposures and are in any event subject to their own risks, including counterparty credit risk. Adverse moves in exchange rates may adversely impact our profitability and financial condition. We cannot guarantee that we will not experience losses, on account of fluctuations in currencies going forward, and such losses may have an adverse effect on our business, results of operations and financial condition.

We face foreign exchange rate risk as certain portion of our revenues are denominated in a currency other than the Indian Rupee. Because of our foreign currency exposure, exchange rate fluctuations between the Indian Rupee and foreign currencies, can have a material impact on our results of operations, cash flows and financial condition.

40. Our employees may engage in misconduct or other improper activities, including non-compliance with regulatory standards and requirements.

We are exposed to the risk of employee fraud or other misconduct. Misconduct by employees could include intentional failures to comply with any regulations applicable to us, to provide accurate information to regulatory authorities, to comply with manufacturing standards we have established, or to report financial information or data accurately or disclose unauthorized activities to us. In particular, sales, marketing and business arrangements in our industry are subject to laws and regulations intended to prevent fraud, misconduct, kickbacks, self-dealing and other abusive practices. These laws and regulations may restrict or prohibit a wide range of pricing, discounting, marketing and promotion, sales commission, customer incentive programs and other business arrangements. While we have not faced such instances in six months period ended September 30, 2024, Fiscal 2024, Fiscal 2023, and Fiscal 2022, there can be no assurance that we will be able to identify and deter such misconduct, and the precautions we take to detect and prevent this activity may not be effective in controlling unknown or unmanaged risk. If our employees engage in any such misconduct, we could face criminal penalties, fines, revocation of regulatory approvals and harm to our reputation, any of which could form a material adverse effect on our business.

41. We have incurred borrowings from commercial banks and any non-compliance with repayment and other covenants in our financing agreements could adversely affect our business and financial condition.

We have entered into agreements with banks for short-term and long-term borrowings. The table below sets out the details of borrowings incurred by our Company for the period mentioned below:

(₹in lakhs)

Particulars	For six months period ended September 30, 2024	Fiscal 2024	Fiscal 2023	Fiscal 2022
Long Term Borrowing	-	-	43.03	152.07
Short Term Borrowing	202.47	19.71	98.68	629.18

Our ability to pay interest and repay the principal for our indebtedness is dependent upon our ability to manage our business operations and generate sufficient cash flows to service such debt. Certain agreements that we have entered into contain restrictive covenants, including requirements that we obtain consent from the lenders prior to undertaking certain matters such as availing any changes in capital structure, formulate any scheme of amalgamation or reconstruction, fresh credit facility, giving fresh loans and advances, opening/ maintaining new bank accounts issuing corporate guarantee etc. Any failure to service such indebtedness, or otherwise perform any obligations under such financing agreements may lead to a termination of one or more of our credit facilities or incur penalties and acceleration of payments under such credit facilities, which may adversely affect our business and financial condition. Further, any fluctuations in the interest rates may directly impact the interest costs of such loans and could adversely affect our financial condition. While there has been no instance of breach of any covenants of financing agreements in past three financial years, there can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the necessary consent to take the actions that we are required to operate and grow our business. Any fluctuations in the interest rates may directly impact the interest costs of such loans, and affect our business, financial condition, results of operations and prospects. Our ability to make repayments and refinance our indebtedness will depend on our continued ability to generate cash from our future operations. We may not be able to generate enough cash flow from operations or obtain enough capital to service our debt.

For more information, please refer to chapter titled “*Financial Indebtedness*” beginning on page 255 of this Prospectus.

42. *If there are delays in setting up the Proposed Expansion and cost overruns related to the Proposed Expansion or installation of Solar Power project are higher than expected, it could have a material adverse effect on our financial condition, results of operations and growth prospects.*

We are in the process of undertaking Proposed Expansion of our existing manufacturing facility at Plot No.6, Survey No. 91/ Paiki-4, Near Sheela Foam, village- Zaroli, Umbergaon, District Valsad, Gujarat (“Proposed Expansion”), all of which would require substantial capital expenditure. Out of the Net Proceeds from fresh issue of ₹488.66 lakhs are proposed to be utilized towards funding capital expenditure requirements at Proposed Expansion and installation of solar power plant. For further information in relation to the Proposed Expansion please see “*Objects of the Issue*” beginning on page 103 of this Prospectus. The Proposed Expansion are expected to commence by March, 2025. The completion of the setting up of the Proposed Expansion is dependent on our ability to arrange finance through Net Proceeds of Fresh Issue or otherwise, the performance of vendors which are responsible for inter alia construction of factory shed, plinth & cementing, footing work, road work and solar rooftop. We cannot assure you that we will be able to arrange for such finance on time. We cannot assure you that we will be able to arrange for such finance on time. Further, we cannot assure you that the performance of vendors will meet the required specifications or performance parameters. We may not be able to identify suitable replacement external vendors in a timely manner. If the performance of these vendors is inadequate in terms of the requirements, this may result in incremental cost and time overruns. However, if we decide to raise additional funds through the issuance of equity or equity-linked instruments, the interests of our shareholders may be diluted. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business prospects could be adversely affected.

There could be delays in setting up the Proposed Expansion as a result of, amongst other things, requirement of obtaining approvals from statutory or regulatory authorities, contractors’ or external agencies’ failure to perform, exchange rate fluctuations, unforeseen problems, disputes with workers, increase in input costs of construction materials and labour costs, incremental preoperative expenses, taxes and duties, interest and finance charges, cost escalation and/ or force majeure events (including the continuing impact of the COVID-19 pandemic, geopolitical tensions, etc.), any of which could give rise to cost overruns and delays in our implementation schedules.

In expansion of our existing manufacturing facility, we may encounter cost overruns or delays for various reasons, including, but not limited to, our financial condition, changes in business strategy and external factors such as market conditions, government restriction on import from countries sharing land borders with India, competitive environment and interest or exchange rate fluctuations, changes in design and configuration of the projects, increase in input costs of construction materials and labour costs, incremental preoperative expenses, taxes and duties, start-up costs, interest and finance charges, working capital margin, environment and ecology costs and other external factors which may not be within the control of our management. If any of the proposed expansion that we propose to set up at our existing manufacturing facility, are not completed in a timely manner, or at all, our business, prospects and results of operations may be adversely affected. Further, the budgeted cost may prove insufficient to meet the requirements of the proposed capital expenditure due to, among other things, cost escalation, which could drain our internal cash flows or compel us to raise additional capital, which may not be available on terms favourable to us or at all. There can be no assurance that we will be able to complete the aforementioned expansion or commissioning of our plants and additions in accordance with the proposed schedule of implementation and any delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

43. *Any material deviation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.*

We propose to utilize the Net Proceeds for funding capital expenditure towards expansion of our existing manufacturing facility and funding of Working Capital requirement of the Company. Such objects have not been appraised by any bank or financial institution, for further details of the proposed objects of the Offer, please refer to chapter titled “*Objects of the Offer*” beginning on page 103 of this Prospectus. At this juncture, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Sections 13(8) and 27 of the Companies Act, 2013 and Schedules XI and XX of the SEBI ICDR Regulation, any material deviation in the utilization of the Net Proceeds as disclosed in this Prospectus requires the Company to obtain the approval of shareholders of our Company through a special resolution. In such event, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations.

Further, our Company and Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with the material deviation of the proposed utilization of Net Proceeds, at a price and

manner as prescribed by SEBI. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders of our Company may deter the Promoters from agreeing to the material deviation of the proposed utilization of the Net Proceeds, even if such material deviation is in the interest of our Company. Further, we cannot assure you that the Promoters will have adequate resources at their disposal at all times to enable them to provide an exit opportunity.

In light of these factors, we may not be able to undertake material deviation of the proposed utilization of the Net Proceeds to use any unutilized proceeds of the Offer, if any, even if such material deviation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Offer Proceeds, if any, which may adversely affect our business and results of operations.

45. *The success of our business depends substantially on a number of key management personnel, management team, and on our operational workforce. Our inability to retain them or to recruit highly skilled technical personnel that are necessary for our business could adversely affect our businesses.*

Our success substantially depends on the continued service and performance of the members of our management team and other key personnel in our business for the management and running of our daily operations and the planning and execution of our business strategy. Our Key Managerial Personnel are experienced in managing our businesses and are difficult to replace. They provide expertise which enables us to make well informed decisions in relation to our businesses and our future prospects. For details of our senior management team and other key personnel, please refer to chapter titled "***Our Management***" beginning on page 179 of this Prospectus. We cannot assure that we shall continue to retain any or all of the key members of our management. The loss of one or more members of our senior management team could severely impact our ability to execute our growth strategy and grow our revenues.

While we believe that our future success depends largely on our continued ability to hire, assimilate, retain and leverage the skills of qualified and skilled personnel, we may not be as successful as our competitors at recruiting, assimilating, retaining and utilizing the skills of such personnel which may adversely affect our ability to realise our growth strategy. Further, our ability to sustain our growth depends significantly upon training these employees effectively. If we are unable to recruit and retain personnel with the requisite experience, our growth and competitive position may be adversely affected.

46. There are certain discrepancies and non-compliances noticed in some of our financial reporting and/or records relating to filing of returns and deposit of statutory dues with the taxation and other statutory authorities.

In the past, our company has on very few instances, delayed in filing our GST & PF returns for which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues. Although the late filing fees levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no-show cause notice has been issued against our Company, in respect of above. In the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our Directors may be affected. the following are the reason for delays filing by the company with payment of late fees.

47. If we do not continue to invest in new technologies and equipment, our technologies and equipment may become obsolete and our cost of processing may increase relative to our competitors, which may have an adverse impact on our business, results of operations and financial condition.

We have over time, improved our technology by improvising on various aspects of the manufacturing methods including material handling, quality enhancement, inventory management, reducing wastage and loss and implementing efficient software to improve operational efficiency. For instance, company has improved quality assurance systems by installing latest machines like XRF machines. We believe that going forward, our profitability and competitiveness will depend in large part on our ability to maintain low cost of operations, including our ability to process and supply sufficient quantities of our products as per the agreed specifications. While we believe that we have achieved technological advancements, if we are unable to respond or adapt to changing trends and standards in technologies and equipment, or otherwise adapt our technologies and equipment to changes in market conditions

or requirements, in a timely manner and at a reasonable cost, we may not be able to compete effectively and our business, financial condition and results of operations may be adversely affected.

48. *We require certain approvals, licenses, registration and permits for our business, and the failure to obtain or renew them in a timely manner may adversely affect our operations.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. If we are unable to renew any of the approvals, licenses, registrations and permits in a timely manner, it will damage our business prospects.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, please refer to chapter titled "**Government and Other Statutory Approvals**" on page 262 of this Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

49. *Any adverse change in regulations governing our products and the products of our customers, may adversely impact our business, prospects and results of operations.*

Regulatory requirements with respect to our products and the products of our customers are subject to change. An adverse change in the regulations governing the development of our products and their usage by our customers, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Our Company may be required to alter our manufacturing process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers. We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for manufacturing or we may be required to withdraw existing products from the market. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

50. *In the twelve months prior to the date of filing the Prospectus, the Company had Offered Equity Shares at a price, which may be lower than the Offer Price.*

In the twelve months prior to the date of filing of this Prospectus, the Company had allotted 74,80,200 Equity Shares on February 1, 2024 as bonus shares to its existing shareholders. For further details on the issuance of Bonus shares, please refer to the chapter titled "**Capital Structure-Equity Share capital history of our Company-(viii) Bonus Issue on February 1, 2024 of 74,80,200 Equity Shares of face value of ₹10 each fully paid-up**" beginning on page 91 of this Prospectus.

51. *Any failure on our part to effectively manage our inventory may result in an adverse effect on our business, revenue from manufacturing operations and financial condition.*

We are a manufacturing entity and, at all points of time, a certain portion of assets comprise inventory of raw materials and finished products. Maintaining sufficient inventory of raw materials is critical for our operations. Any failure on our part to effectively manage our inventory of raw materials and finished products in response to changing market scenario may have an adverse effect on our financial condition and may even lead to loss of materials and increase the costs of our operations. In the event, we overestimate our requirements for raw materials as compared to the demand for our products, it may lead to wastage and increase our operating costs and further restrict our ability to service our customers in a timely and cost-efficient manner. Additionally, if our inventory of finished products is not dispatched on time or if there is an unanticipated delay in the delivery of our finished products or if the finished products are not properly maintained or are damaged or destroyed, we could lose such inventory which could have an adverse impact on our production cycle, results of operation and financial condition.

52. Our Company may not be successful in penetrating new export markets.

Expansion into new export markets subjects us to various challenges, including those relating to our lack of familiarity with the culture and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations. In addition, the risks involved in entering new geographic markets, may be higher than expected, and we may face significant competition in such markets. By expanding into new geographical regions, we could be subject to additional risks associated such as compliance with a wide range of laws, regulations and practices; exposure to expropriation or other government actions; and political, economic and social instability.

53. The shortage or non-availability of power facilities may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial condition.

We require substantial power for our manufacturing facilities. The following tables set forth below our power expenses in the years/ periods indicated:

Particulars	For the six months period ended September 30, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amount (₹ in Lakhs)	As a percent of Revenue from Operations (%)	Amount (₹ in Lakhs)	As a percent of Revenue from Operations (%)	Amount (₹ in Lakhs)	As a percent of Revenue from Operations (%)	Amount (₹ in Lakhs)	As a percent of Revenue from Operations (%)
Electricity Expenses – Factory	81.02	1.78%	187.42	1.88%	169.88	1.75%	124.94	1.99%

Our manufacturing processes require substantial amount of power facilities. We have arrangements for regular power supply at our manufacturing facility. The total sanctioned and connected power load of our Manufacturing facility is 1000 KVAH from Dakshin Gujarat Vij Company Limited and 450 KWp of solar plant respectively. We rely upon diesel generator sets for certain units to ensure continuity of operations in case of power outage. The requirement of power is met by supply from the local state power grid and solar power plant. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented / augmented by alternative/ independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high in view of oil prices and other constraints. Our Company is mainly dependent on the State Governments for meeting its electricity requirements. Any disruption / non-availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company. There have been no major instances of power failure in the last three years.

There can be no assurance that the electricity supplied to our existing manufacturing facility will be sufficient to meet our requirements or that we will be able to procure adequate and uninterrupted power supply in the future at a reasonable cost. If the per unit cost of electricity is increased by the state electricity board our power cost will increase. Any changes in government policies or local power and water shortages could adversely affect our production facility and ultimately our operations or financial condition may be adversely affected. A prolonged suspension in production could materially and adversely affect our business, financial condition, results of operations or cash flows.

54. Information relating to the current and historical installed capacity of the plants in our Manufacturing Facility included in this Prospectus are based on various assumptions and estimates.

Information relating to the current and historical installed capacity of the plants currently in our manufacturing facility are based on certain technical assumptions. Such assumptions include assumptions for arriving at production capacity like number of shifts and the duration of each shift. Prospective investors should not place undue reliance on the historical installed capacity information in our Manufacturing facility. Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facility, the availability of raw materials, industry/ market conditions, as well as by the product requirements of, and procurement practice followed by, our customers. In the event we face prolonged disruptions at our facilities including due to interruptions in the supply of electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our current manufacturing facility, resulting in operational inefficiencies which could have a material adverse effect on our business and financial condition.

While we have obtained a certificate from S.K. Patel, dated December 04, 2024, actual capacities and utilization rates may differ significantly from the estimated installed capacities or estimated capacity utilization information of

our facilities. Undue reliance should therefore not be placed on our installed capacity or estimated capacity utilization information for our existing facility included in this Prospectus. For further details, please refer to the chapter titled **“Business Overview-Capacity and Capacity Utilization”** beginning on page 152 of this Prospectus.

55. Any failure of our information technology systems could adversely affect our business and our operations.

Our business is dependent upon information technology systems, including internet-based systems, to support business processes. Our IT infrastructure enables us with various functions to track procurement of raw materials, sale of finished goods, inventory management, taxation management, payments to vendors and receivables from customers. Our computer systems may be potentially vulnerable to breakdown, malicious intrusion and computer viruses and these systems may be susceptible to outages due to fire, power loss, telecommunications failures, natural disasters, break-ins and similar events. We cannot assure you that we will not encounter disruptions to our information technology systems in the future and any such disruption may result in the loss of key information or disruption of our business processes, which could adversely affect our business and results of operations.

Contingent liabilities and commitments”** beginning on page 201 of this Prospectus.

57. Our Company has availed unsecured loan from related parties, which are repayable on demand. Any demand for repayment of such unsecured loans may affect our cash flows and financial condition.

As per the Restated Financial Statements as on September 30, 2024, our Company has a sum of ₹ 13.07 lakhs outstanding short-term unsecured loans from related parties which are repayable on demand. Such loans may not be repayable at the time of demand by such related parties. In the event that any lender seeks repayment of any such unsecured loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. A sudden recall may disrupt our operations. This would result in shortage of working capital fund. For further details, please see **“Financial Indebtedness”** on page 255 of this Prospectus. Any demand for the repayment of such unsecured loans, may adversely affect our cash flow and financial condition.

58. In the event there is any delay in the completion of the Offer, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Offer which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the Objects of the Offer as has been stated in the chapter **“Objects of the Offer”** beginning on page 103 of this Prospectus. The proposed schedule of implementation of the objects of the Offer is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Offer, we may have to revise our business, development

and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

59. Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us and any sale of Equity Shares by Our Promoters may dilute your shareholding and adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us may lead to a dilution of your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur, may significantly affect the trading price of the Equity Shares. We cannot assure you that we will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

62. Our Industry is sensitive to general economic downturn

Our Industry is inherently sensitive to general economic downturns. Any adverse developments affecting the industry can have a significant impact on our business, prospects, financial condition, and results of operations. Our business is highly vulnerable to regional conditions and economic downturns, making it susceptible to unforeseen events or circumstances that negatively affect the industry, leading to material adverse effects on our sales and

profitability. These factors encompass a range of elements, including changes in demographics, population, and income levels. Moreover, our business is exposed to risks associated with regional natural disasters and other catastrophic events, such as telecommunications failures, cyber-attacks, fires, riots, and political unrest. Any materially adverse social, political, or economic development, natural calamities, civil disruptions, or changes in the policies of local governments within the industry could adversely affect operations at our manufacturing facility. Specifically, natural disasters such as earthquakes, extreme weather conditions like floods, droughts, or region-specific diseases, may disrupt the supply chain, affecting the availability of raw materials, end-products, and local transportation. These disruptions would have a significant and adverse impact on our business, profitability, and overall reputation

External Risk Factors

63. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in India as well as other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

In addition to the above, our Company is incorporated in India and its assets are located in India. Consequently, our performance and the market price of the Equity Shares may be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- epidemic, pandemic or any other public health in India or in countries in the region or globally, including in India's various neighboring countries, such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID- 19 pandemic;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- occurrence of natural or man-made disasters (such as typhoons, flooding, earthquakes and fires) which may cause us to suspend our operations;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its consumption sector;
- international business practices that may conflict with other customs or legal requirements
- to which we are subject, including anti-bribery and anti-corruption laws;
- protectionist and other adverse public policies, including local content requirements, import/export tariffs, increased regulations or capital investment requirements;
- logistical and communications challenges;
- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms or on a timely basis; and

- being subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so.

Any slowdown or perceived slowdown due to these factors could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

64. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details, please refer chapter titled “**Key Industry Regulations and Policies**” beginning on page 168 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations.

The governmental and regulatory bodies may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, results of operations and financial condition.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations, including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals.

The Government of India has notified four labour codes which are yet to completely come into force as on the date of this Prospectus, namely, (i) The Code on Wages, 2019, (ii) The Industrial Relations Code, 2020, (iii) The Code on Social Security, 2020 and (iv) The Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations.

There can be no assurance that the Government of India will not implement new regulations and policies requiring us to obtain approvals and licenses from the Government of India or other regulatory bodies or impose onerous requirements and conditions on our operations. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and financial condition.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time-consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

65. Significant differences exist between Ind AS and other accounting principles, such as Indian GAAP, IFRS and U.S. GAAP, which may be material to investors' assessment of our financial condition.

The Restated Financial Statements for the Financial years ended 2024, 2023 and 2022 included in this Prospectus have been prepared under Ind GAAP notified under the Companies (Indian Accounting Standards) Rules, 2015 read with Section 133 of the Companies Act, 2013 to the extent applicable.

Ind AS differs from other accounting principles with which prospective investors may be familiar, such as Indian GAAP, IFRS and U.S. GAAP. As a result, the financial statements prepared under Ind GAAP may not be comparable to our historical financial statements. Accordingly, the degree to which the financial statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind GAAP. Persons not familiar with Ind GAAP should limit their reliance on the financial disclosures presented in this Prospectus. In addition, our Restated Financial Statements may be subject to change if new or amended Ind GAAP accounting standards are issued in the future or if we revise our elections or selected exemptions in respect of the relevant regulations for the implementation of Ind GAAP. Accordingly, the degree to which the Financial Statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Persons not familiar with Indian accounting practices should limit their reliance on the financial disclosures presented in this Prospectus.

66. *If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations*

The Government of India may implement new laws or other regulations that could affect the industry, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. To the extent that we are entitled to certain tax benefits in India which are available for a limited period of time, our profitability will be affected if such benefits will no longer be available, or are reduced or withdrawn prematurely or if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of each of these benefits. Please refer to chapter titled “*Statement of Tax Benefits*” beginning on page 124 of this Prospectus. In the event that any adverse development in the law or the manner of its implementation affects our ability to benefit from these tax incentives, our business, results of operations, financial condition and prospects may be adversely affected.

67. *A third party could be prevented from acquiring control of us because of anti-takeover provisions under Indian law.*

Indian law has restrictions that could delay, dissuade, or prevent a future takeover or change of control of our Company. An acquirer is defined under the Takeover Regulations as anyone who, directly or indirectly, acquires or agrees to acquire shares, voting rights, or control over a firm, whether acting alone or in collaboration with others. Although these measures have been drafted to safeguard the interests of investors and shareholders, they may also deter a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

68. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and any other country might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares. India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares

69. *Any increase in regional hostilities between India and neighbouring countries, could adversely affect Indian economy and cause our business to suffer.*

India has from time-to-time experienced instances of social and civil unrest and hostilities with neighboring countries. Any escalation in regional tension and conflicts in the future could influence the Indian economy and have an adverse effect on our business, our future financial performance and the market for securities of Indian companies, including our equity shares.

70. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows.

Furthermore, economic developments globally can have a significant impact on India. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy.

71. *If inflation rises in India, increased costs may result in a decline in profits.*

Inflation rates in India have been volatile in recent years, and such volatility may continue. India has experienced high inflation relative to developed countries in the recent past. Increasing inflation in India could cause a rise in the costs of rent, wages, raw materials and other expenses. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our consumers, whether entirely or in part, and may adversely affect our business and financial condition. If we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows. Furthermore, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

72. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares. Accordingly, our ability to raise foreign capital may be constrained.*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Furthermore, under applicable foreign exchange regulations in India, transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions), if they comply with the pricing guidelines and reporting requirements specified under applicable law. If a transfer of shares is not in compliance with such requirements and does not fall under any of the permissible exceptions, then prior approval of the relevant regulatory authority is required. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness.

Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. Furthermore, this conversion is subject to the shares having been held on a repatriation basis and, either the security having been sold in compliance with the pricing guidelines or, the relevant regulatory approval having been obtained for the sale of shares and corresponding remittance of the sale proceeds. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. We cannot assure you that any required regulatory approvals for borrowing in foreign currencies will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have an adverse effect on our business growth, financial condition and results of operations.

73. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

74. *Our business is mainly dependent on the stability of policies and economic condition of the countries with which we do business.*

The performance and growth of our business is necessarily dependent on the stability of policies and economic conditions of the countries in which we operate, which may be materially and adversely affected by political instability or regional conflicts, a general rise in interest rates, inflation, change in government policies, taxation, and economic slowdown elsewhere in the world or otherwise. Economic growth is affected by various factors including movements in key imports global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the economy of such countries or a further increase in inflation could have a material adverse effect on our services and, as a result, on our business and financial results. Financial turmoil in USA and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability, including the financial crisis and deterioration of credit conditions in these countries, could also have a negative impact on our business.

75. *We may be affected by competition law in India and any adverse application or interpretation of the Competition Act could in turn adversely affect our business.*

The Competition Act prohibits any anti competition agreement or arrangement, understanding or action in concert between enterprises, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition in India.

The Competition Act also prohibits abuse of a dominant position by any enterprise. The combination regulation (merger control) provisions under the Competition Act require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by, the Competition Commission of India, or CCI. Any breach of the provisions of Competition Act, may attract substantial monetary penalties.

The Competition Act aims to, among other things, prohibit all agreements and transactions, which may have an appreciable adverse effect in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside of India if such agreement, conduct or combination has an appreciable adverse effect in India. We are not currently party to any outstanding proceedings, nor have we ever received any notice in relation to non-compliance with the Competition Act. Any enforcement proceedings initiated by the CCI in future, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI may affect our business, financial condition and results of operations.

76. *Changes or uncertainty in international trade policies or tariffs could disrupt our export sales outside India or negatively impact our financial results.*

Our export sales outside India expose us to number of risks related to trade protection laws, tariffs, excise or other border taxes on products exported to certain countries. Changes or uncertainty in international trade policies or tariffs could impact our global operations, as well as our customers. We may be required to incur additional costs to manufacture and distribute certain of our products. This could adversely impact our business and results of operations.

77. *An investment in the Equity Shares is subject to general risk related to investments in Indian Companies.*

Our Company is incorporated in India and all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

78. *Fluctuations in the exchange rate of the Rupee and other currencies could have a material adverse effect on the value of the Equity Shares, independent of our operating results.*

The Equity Shares are quoted in Rupees on the EMERGE Platform of NSE. Any dividends in respect of the Equity Shares will be paid in Rupees and subsequently converted into appropriate foreign currency for repatriation. Any adverse movement in exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the net proceeds received by shareholders. The exchange rate of the Rupee has changed substantially in the last two decades and could fluctuate substantially in the future, which may have a material adverse effect on the value of the Equity Shares and returns from the Equity Shares, independent of our operating results.

79. *If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

RISKS RELATING TO THE EQUITY SHARES AND THE OFFER

80. *The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer price and you may not be able to sell your Equity Shares at or above the Offer Price.*

The Price Band and Offer Price of our Equity Shares was determined before filing of Prospectus with RoC by our Company in consultation with Book Running Lead Manager. The price determined was based on numerous factors (For further information, please refer chapter titled “*Basis for Offer Price*” beginning on page 114 of this Prospectus and may not be indicative of the market price of our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price include without limitation. The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control;

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- failure of securities analysts to cover the Equity Shares after the Offer;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

81. *Our Equity Shares have not been publicly traded prior to this Offer. After this Offer, our Equity Shares may experience price and volume fluctuations and an active trading market for our Equity Shares may not develop. Further, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Offer Price, or at all.*

Prior to this Offer, there has been no public market for our Equity Shares. An active trading market on the Stock Exchanges may not develop or be sustained after this Offer.

The trading price of our Equity Shares after this Offer may be subject to significant fluctuations in response to factors including general economic, political and social factors, developments in India's fiscal regime, variations in our operating results, volatility in Indian and global securities markets, developments in our business as well as our industry and market perception regarding investments in our business, changes in the estimates of our performance or recommendations by financial analysts, and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. The trading price of our Equity Shares may also decline in reaction to events that affect the entire market and/or other companies in our industry even if these events do not directly affect us and/or are unrelated to our business or operating results.

Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

82. *QIBs and Non-Institutional Investors were not permitted to withdraw or lower their applications (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting an Application and Retail Individual Investors were not permitted to withdraw their Applications after Application/Offer Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders were not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders could revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Offer within three (3) Working Days from the Bid/ Issue Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Offer or may cause the trading price of our Equity Shares to decline on listing.

Retail Individual Investors can revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Offer within three (3) Working Days from the Bid/Offer Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

83. *You will not be able to immediately sell any of the Equity Shares you purchase in this Offer on the Stock Exchanges*

The Equity Shares will be listed on the Stock Exchange. Pursuant to the applicable Indian laws and practice, permission for listing of the Equity Shares will not be granted till the Equity Shares in this Offer have been issued and allotted and all relevant documents are submitted to the Stock Exchanges. Further, certain actions must be completed prior to the commencement of listing and trading of the Equity Shares such as the Investor's book entry or 'demat' accounts with the depository participants in India, expected to be credited within one (1) Working Day of the date on which the Basis of Allotment is finalized with the Designated Stock Exchange. In addition, the Allotment of Equity Shares in the Offer and the credit of such Equity Shares to the applicant's demat account with the depository participant could take approximately five Working Days from the Bid/Offer Closing Date and trading in Equity Shares upon receipt of listing and trading approval from the Stock Exchanges, trading of Equity Shares is expected to commence within three Working Days from Bid/ Offer Closing Date. Any failure or delay in obtaining the approval or otherwise commence trading in Equity Shares would restrict your ability to dispose of your Equity Shares. We cannot assure you that the Equity Shares will be credited to investors' demat accounts or that trading in the Equity Shares will commence in a timely manner (as specified herein) or at all. We could also be required to pay interest at the applicable rates if the allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods

84. *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Capital gains arising from the sale of equity shares within 12 months in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") is paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, is subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares is exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident.

Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares

85. *Any future issuance of Equity Shares by us may dilute your shareholding and sales of the equity shares by our Promoter, Promoter Group or other major shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by us may dilute your shareholding in us. In addition, any sales of substantial amounts of the Equity Shares in the public market after the completion of the Offer, including by our Promoter or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could materially impair future ability of us to raise capital through offerings of the Equity Shares. After the completion of the Offer, our Promoters will continue to hold 63.62 % of the Post-Paid Equity Shares. As such, there can be no assurance that our Company will not issue additional Equity Shares after the lock-in period expires or that our Promoter will not sell, pledge or encumber his Equity Shares after the lock-in periods expire. Future issuances of Equity Shares or convertible securities and the sale of the underlying Equity Shares could dilute the holdings of our Shareholders and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the then trading price of our Equity Shares or the Offer Price. Sales of Equity Shares by the Promoter could also adversely affect the trading price of our Equity Shares. We cannot predict the effect, if any, that the sale of the Equity Shares held by our Promoters or other major shareholders or the availability of these Equity Shares for future sale will have on the market price of the Equity Shares.

86. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.*

A public company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equities shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offer document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

87. *There is no guarantee that our Equity Shares will be listed on the EMERGE platform of NSE in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until Allotment of Equity Shares pursuant to this Offer.

In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the stock exchange within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

88. *The requirements of being a listed company may strain our resources.*

We are not a listed company and have historically not been subjected to the compliance requirements and increased scrutiny of our affairs by shareholders, regulators and the public at large associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited half-yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations or cash flows as promptly as other listed companies.

Further, as a listed company, we will be required to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

89. *Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.*

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as shareholders of an entity in another jurisdiction.

90. *The determination of the Price Band was based on various factors and assumptions and the Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer. Our Equity Shares have never been publicly traded, and after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop.*

The determination of the Price Band was based on various factors and assumptions and were determined by our Company in consultation with the Book Running Lead Manager. Furthermore, the Offer Price of the Equity Shares was determined by our Company in consultation with the Book Running Lead Manager through the Book Building Process. These were based on numerous factors, including factors as described under chapter titled "***Basis for the Offer Price***" beginning on page 114 and may not be indicative of the market price for the Equity Shares after the Offer. Additionally, the current market price of securities listed pursuant to certain previous initial public offerings managed by the Book Running Lead Manager is below their respective Offer price. For further details, please refer to chapter titled "***Other Regulatory and Statutory Disclosures – Price information of past issues handled by the Book Running Lead Manager***" beginning on page 273 of this Prospectus.

The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure you that an active market will develop, or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

91. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.*

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

92. *There may be less information available about the Company in Indian securities markets than in securities markets in other more developed countries.*

There is a difference between the level of regulation, disclosure and monitoring of the Indian securities markets and the activities of investors, brokers and other participants and that of markets in the United States and other more developed economies. SEBI is responsible for ensuring and improving disclosure and other regulatory standards for the Indian securities markets. SEBI has issued regulations on disclosure requirements, insider trading and other matters. There may, however, be less publicly available information about Indian companies than is regularly made available by public companies in more developed economies. As a result, shareholders may have access to less information about our business, results of operations and financial condition than those of our competitors that are listed on the Stock Exchanges and other stock exchanges in India on an ongoing basis than shareholders may have in the case of companies' subject to the reporting requirements of other more developed countries.

93. *We may be subject to surveillance measures, such as the Additional Surveillance Measures and the Graded Surveillance Measures by the Stock Exchanges which may adversely affect trading price of our Equity Shares.*

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures. The main objective of these measures is to alert and advice investors to be extra cautious while dealing in these securities and advice market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health

and fundamentals such as earnings, book value, fixed assets, net-worth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility.

On listing, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the Offer due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the abovementioned factors may trigger the parameters identified by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation.

In the event our Equity Shares are subject to such pre-emptive surveillance measures implemented by any of the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

In evaluating our business, we consider and use certain KPIs, as stated above, as a supplemental measure to review and assess our financial and operating performance. The presentation of these KPIs is not intended to be considered in isolation or as a substitute for the Restated Financial Statement. We use these KPIs to evaluate our financial and operating performance. Some of these KPIs are not defined under Ind GAAP and are not presented in accordance with Ind GAAP. These KPIs have limitations as analytical tools. Further, these KPIs may differ from the similar information used by other companies and hence their comparability may be limited. Therefore, these metrics should not be considered in isolation or construed as an alternative to Ind GAAP measures of performance or as an indicator of our operating performance, liquidity or results of operation. Although these KPIs are not a measure of performance calculated in accordance with applicable accounting standards, our management believes that it provides an additional tool for investors to use in evaluating our ongoing operating results and trends and in comparing our financial results with other companies in our industry because it provides consistency and comparability with past financial performance, when taken collectively with financial measures prepared in accordance with Ind GAAP. Investors are encouraged to review the Ind GAAP financial measures and to not rely on any single financial or operational metric to evaluate our business.

INTRODUCTION

Manufacturing is emerging as an integral pillar in the country’s economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian manufacturing industry generated 16-17% of India’s GDP pre-pandemic and is projected to be one of the fastest growing sectors.

The machine tool industry was literally the nuts and bolts of the manufacturing industry in India. Today, technology has stimulated innovation with digital transformation a key aspect in gaining an edge in this highly competitive market.

Technology has today encouraged creativity, with digital transformation being a critical element in gaining an advantage in this increasingly competitive industry. The Indian manufacturing sector is steadily moving toward more automated and process-driven manufacturing, which is projected to improve efficiency and enhance productivity.

India has the capacity to export goods worth US\$ 1 trillion by 2030 and is on the road to becoming a major global manufacturing hub.

With 17% of the nation’s GDP and over 27.3 million workers, the manufacturing sector plays a significant role in the Indian economy. Through the implementation of different programmes and policies, the Indian government hopes to have 25% of the economy’s output come from manufacturing by 2025.

India now has the physical and digital infrastructure to raise the share of the manufacturing sector in the economy and make a realistic bid to be an important player in global supply chains.

A globally competitive manufacturing sector is India's greatest potential to drive economic growth and job creation this decade. Due to factors like power growth, long-term employment prospects, and skill routes for millions of people, India has a significant potential to engage in international markets. Several factors contribute to their potential. First off, these value chains are well positioned to benefit from India's advantages in terms of raw materials, industrial expertise, and entrepreneurship.

Second, they can take advantage of four market opportunities: expanding exports, localising imports, internal demand, and contract manufacturing. With digital transformation being a crucial component in achieving an advantage in this fiercely competitive industry, technology has today sparked creativity. Manufacturing sector in India is gradually shifting to a more automated and process driven manufacturing which is expected to increase the efficiency and boost production of the manufacturing industry.

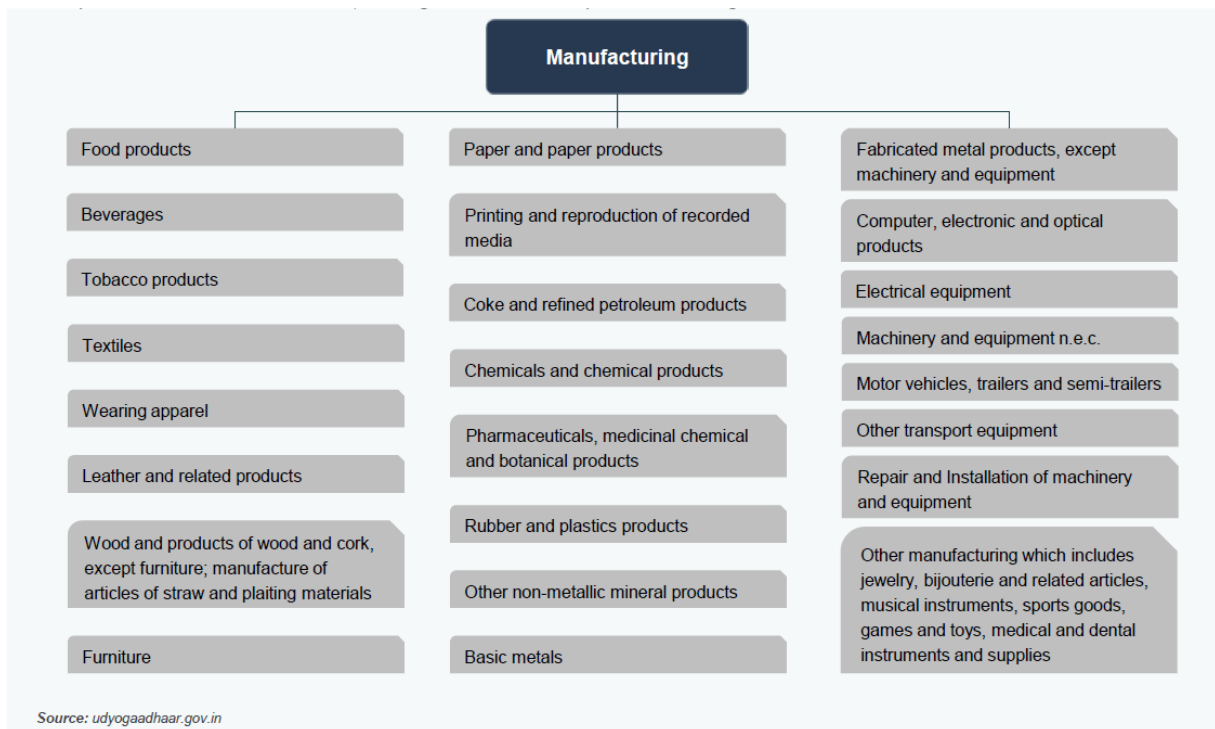

India is gradually progressing on the road to Industry 4.0 through the Government of India’s initiatives like the National Manufacturing Policy which aims to increase the share of manufacturing in GDP to 25 percent by 2025 and the PLI scheme for manufacturing which was launched in 2022 to develop the core manufacturing sector at par with global manufacturing standards.

India is planning to offer incentives of up to Rs. 18,000 crore (US\$ 2.2 billion) to spur local manufacturing in six new sectors including chemicals, shipping containers, and inputs for vaccines.

India's mobile phone manufacturing industry anticipates creating 150,000 to 250,000 direct and indirect jobs within the next 12-16 months, driven by government incentives, and increased global demand. Major players like Apple and its contract manufacturers, along with Dixon Technologies, are expanding their workforce to meet growing production needs.

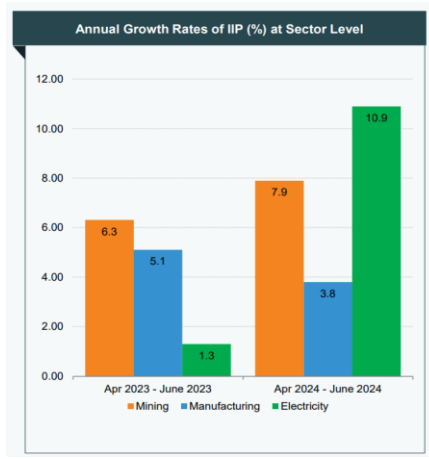

Sub sector under Manufacturing:

As per National Industrial Classification, following 24 activities make up the manufacturing sector in India:

Industrial production

- The Index of Industrial Production (IIP) is prepared by the Central Statistics Office to measure the activity happening in three industrial sectors namely mining, manufacturing, and electricity.
- It is the benchmark index and serves as a proxy to gauge the growth of the manufacturing sector of India since manufacturing alone has a weight of 77.63% in the index.
- For the month of June 2024, the Quick Estimates of Index of Industrial Production (IIP) with base 2011-12 stands at 150. The Indices of Industrial Production for the Mining, Manufacturing and Electricity sectors for the month of January 2024 stand at 134.9, 145.3, 222.8, respectively.
- The Index of Industrial Production (IIP) from April-March 2024 stood at 150.8.
- India's manufacturing sector demonstrated resilience in the April to June 2024 quarter, achieving a growth rate of 3.8%, down from 5.1% in the same period last year. Noteworthy contribution came from the manufacture of electrical equipment, which surged by an impressive 28.4% compared to the previous year.
- Strong performance in manufacturing attributed to favorable base effect, low input cost pressures, and increased government expenditure, driving Gross Fixed Capital Formation (GFCF) and corporate investments

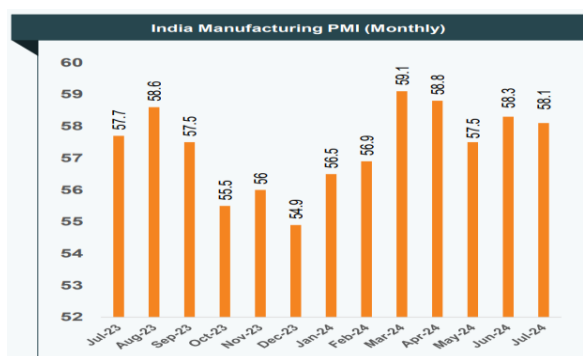

Performance of eight core industries

- The Index of Eight Core Industries (ICI) is an index reflecting the production performance of eight core industries - coal production, crude oil production, natural gas production, petroleum refinery processing, steel production, cement production and electricity generation.

- In July 2024, the Manufacturing Purchasing Managers' Index (PMI) in India stood at 58.1.
- India's manufacturing industry witnessed its fastest expansion in 16 years in March, with the HSBC final India Manufacturing Purchasing Managers' Index (PMI) soaring to 59.1, the highest since February 2008. This surge was fuelled by increased demand, resulting in notable improvements in new orders, output, input stocks, and job creation, as reported by S&P Global.

- In May 2024, the Manufacturing Purchasing Managers' Index (PMI) in India stood at 57.5.

Capacity utilisation in manufacturing sector

- Capacity utilization at manufacturing facilities was at a robust 74.3% in Q3 of FY23, up from 74% in Q2. Utilization has held above the 72% mark since Q3 of FY22, indicating that the manufacturing activity is taking place at a brisk pace.
- India's manufacturing sector, driven by pharmaceuticals, motor vehicles, and cement demonstrated resilience despite weak global demand in July-August 2023. PMI remained robust, reflecting domestic economic strength. Capacity utilization in manufacturing trended upwards, signalling positive investment prospects. RBI MPC maintained policy repo rate to control inflation.
- At the aggregate level, the capacity utilization (CU) in the manufacturing sector increased to 74.7% in Q3:2023-24 from 74% in the previous quarter.

Name of Products	Product Image	Application	Description
Welding electrodes		various industries use our electrodes, including construction, automotive, thermal power etc	Welding Electrodes are an important part of the welding process. They provide a medium for the electric current to travel between the welded metal and the welder. The electrode also provides a filler material for the weld. Some of the types that we manufacture are mild steel electrodes, low hydrogen type electrodes, low alloy high tensile electrodes, stainless steel electrodes, hard-facing electrodes, casting electrodes, cutting & gauging electrodes, low heat input electrodes and non-ferrous electrodes.
Flux Cored Wire		various industries use our electrodes, including PEB, thermal power, construction, refineries, shipyards etc	Flux cored Arc welding (FCAW) is frequently referred to as flux cored welding. Flux cored welding is high deposition rate welding process that adds the benefits of flux to the welding simplicity of MIG welding. As in MIG welding wire is continuously fed from a spool. Flux cored welding is therefore referred to as a semiautomatic welding process. They are used for various welding activities like joining, wear protection and repairs involve use of Flux-cored wires. These wires are available in a variety of sizes and specifications. In addition, these cored wires undergo various industrial tests to ensure quality.

Increasing our manufacturing capacity to focus on the growing demand of our core products

We have over the years increased our production capacities through consistent growth and innovation. Our Company commenced manufacturing of welding consumables of welding electrodes and flux cored wire with an installed capacity of 18,000 MTPA in our manufacturing unit situated at Plot No.6, Survey No. 91/ Paiki-4, Near Sheela Foam, village-Zaroli, Umbergaon Valsad, Gujarat, Bharat. In order to capture the market and cater to the growing demand, in the year 2003, we increased our manufacturing capacity and thereafter we further expanded our manufacturing facility in 2014 spread over approx. 25082.61 sq. mtr. We believe that our strong presence in the Indian market positions us well to capitalise on the anticipated growth in demand of our products. We intend to expand the manufacturing capacity by establishing a new factory shed in the same premises as our manufacturing facility, which will increase the present capacity and subsequently boost our sales and profitability. As part of such investment, we intend to incur expenditure towards pre-fabricated shed, plinth and cementing and other related expenses for factory construction for ₹ 373.82 Lakhs and solar installation for ₹ 114.84 lakhs, from Net Proceeds of the Issue. The strategic decision to add an additional factory shed, will increase our ability to cater to the expected increase in demand of our products. We believe that our strategic decision to expand our manufacturing unit will significantly increase our product offering and we also expect to benefit from economies of scale. - enhance our depth of experience, knowledge-base and know-how; and
- increase our network of dealers, customers and geographical reach.

Increasing our penetration in existing regions with new range of products, will enable us to penetrate into new catchment areas within these regions and optimize our infrastructure. As a result, of these measures, our company will be able to increase its market share and profitability.

Improving operational efficiencies

Our Company intends to improve efficiencies to achieve cost reductions so that they can be competitive. We believe that this can be done through automation of the manufacturing process and through energy saving. For instance, we upgraded our manufacturing process by induction of XRF machinery. Further, we have also installed 450 KWp of rooftop solar installation which reduce our dependency on grid for our energy requirement and also reduce our cost of power. In addition to this, our Company also use gas-fired furnace technology for baking of electrodes, which helps in energy efficiency.

Our Manufacturing Facility

“We carry our manufacturing operations from our unit located at Zaroli, Umbergaon Valsad, Gujarat, Bharat having approx. land area 25082.61 sq. mtr out of which 9290.23 sq. mtr is constructed. Our Unit is supported by an infrastructure for the storage of raw materials, manufacturing of our products, storage of finished goods, together with a quality control laboratory.”

Capacity and Capacity utilization

The following table sets forth certain information relating to the capacity utilization of our Units calculated based on total installed production capacity and actual production as of/ for the periods indicated below:

*As certified by Shivabhai Patel, Chartered Engineer vide the certificate dated December 04, 2024.

The information relating to the installed production capacity of our Unit, as included above and elsewhere in this Prospectus are based on various assumptions and estimates that have been considered by the chartered engineer for calculation of our capacity. These assumptions and estimates include the standard capacity calculation practice of the welding and anti-wear consumables, wear plates/wear parts, and heavy engineering equipment industry after examining the calculations and explanations provided by us.

Actual production levels and utilization rates may vary from the capacity information of our Units included in this Prospectus and undue reliance should not be placed on such information. Please refer to chapter titled **“Risk Factor No. 11 - Under-utilization of our manufacturing capacities and an inability to effectively utilize our expanded manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.”** beginning on page 40 of this Prospectus.

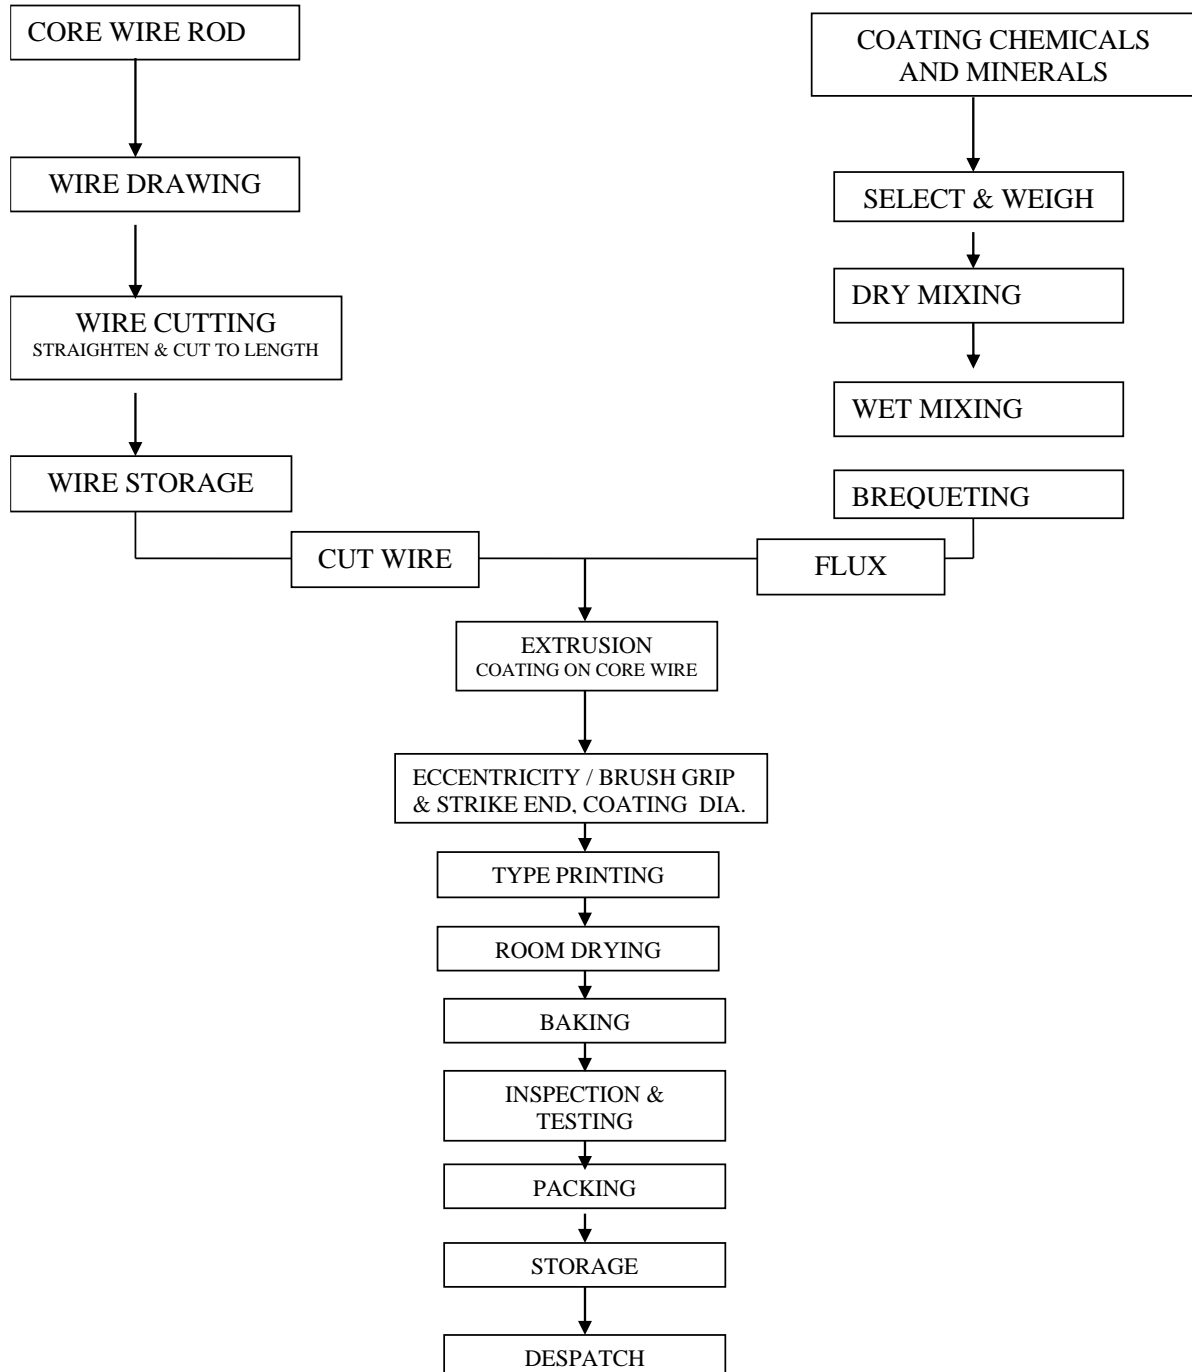

Rationale for less capacity utilization by the Company:

- a) The installed capacity is determined based on working hours of 24 hours a day. However, considering the criticality of the product quality, the company undertakes non critical operations during night time.
- b) The capacity utilization is based on actual products manufactured during 8 hours shift adjusted for overtime. Hence capacity utilization is lower than installed capacity

B SIGNIFICANT ACCOUNTING POLICIES

1 Basis of Preparation

The financial statements have been prepared in conformity with the generally accepted accounting principles to comply in all material respects with the notified Accounting Standards (AS) under Companies Act, 2013 and the relevant provisions of the Companies Act 2013("the Act"). The financial statements have been prepared under the historical cost convention, on an accrual basis. The accounting policies have been consistently applied by the Company and are consistent with those used in the previous year.

2 Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenue and expenses during the reporting period. Difference between the actual results and estimates are recognised in the period in which the results are known / materialized.

3 Property, Plant and Equipment and Depreciation

Property, Plant & Equipment are carried at cost of acquisition less accumulated depreciation and its written down value is stated. Cost includes inward freight, duties, taxes and incidental expenses related to the acquisition, construction and installation of the fixed assets. Borrowing costs directly attributable to acquisition or construction of those fixed assets which necessarily take a substantial period of time to get ready for their intended use are capitalised. Depreciation is provided under straight-line method so as to write-off the cost of the assets over its useful life as prescribed in Schedule II of the Companies Act, 2013.

4 Intangible Assets

Expenditure on regulatory approval for Licenses for Sale of Goods in foreign countries is recognized as an intangible asset and the same is amortized over a period of five years & Expenditure on software development is recognized as an intangible asset and same is amortized over a period of five years.

5 Capital Work-in-progress

Cost and direct expense incurred for construction of assets or assets to be acquired and which are not ready for use are disclosed under "Capital Work-in-progress"

6 Leases

Assets taken on lease by the Company in its capacity as lessee, where the Company has substantially all the risks and rewards of ownership are classified as finance lease. Such a lease is capitalised at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognised for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognised as operating leases. Lease rentals under operating leases are recognised in the statement of profit and loss on a straight-line basis.

7 Impairment

a) The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the assets net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital.

b) After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

c) A previously recognised impairment loss is increased or reversed depending on changes in circumstances. However, the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation if there was no impairment.

Annexure IV - Significant Accounting Policies
(Amounts in INR Lakh, unless otherwise stated)

8 Investments

Long Term Investments are carried at cost. Provision is made for any diminution in value of investments, if the diminution is other than temporary.

9 Employee Benefits

(i) Post-employment benefit plans

Contributions to defined contribution retirement benefit schemes are recognised as expense when employees have rendered services entitling them to such benefits.

For defined benefit schemes, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in full in the statement of profit and loss for the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested, or amortised on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, and as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of available refunds and reductions in future contributions to the scheme.

(ii) Other employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognised during the period when the employee renders the service. These benefits include compensated absences such as paid annual leave, overseas social security contributions and performance incentives.

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as an actuarially determined liability at the present value of the defined benefit obligation at the balance sheet date.

10 Revenue recognition

Revenue from sales is recognized as and when the goods are dispatched to the customers and invoice is prepared.

Other income is recognized on accrual basis and when there is reasonable certainty of its collection.

11 Taxation

Current Tax is the amount of tax payable for the year as determined in accordance with the provision of the Income Tax Act, 1961.

Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax after the tax holiday period. Accordingly, MAT is recognised as an asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with it will fructify.

Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis.

The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

12 Foreign currency transactions

Transactions denominated in foreign currencies are normally recorded at the exchange rate prevailing at the time of the transaction. Monetary items in foreign currencies at the balance sheet date are translated at rates as at the balance sheet date. Any income or expense on account of exchange difference either on settlement or on translation is recognized in profit & loss account except in cases where they relate to acquisition of Fixed Assets, in which case they are adjusted to carrying cost of Fixed Assets.

Annexure IV - Significant Accounting Policies
(Amounts in INR Lakh, unless otherwise stated)

13 Earnings per share

The basic and diluted earnings per share is computed by dividing the profit/loss after tax available for equity shareholders by the weighted average number of equity shares outstanding during the reporting period.

14 Employee benefits

Employee benefit expenses include salary, wages, performance incentives, compensated absences, medical benefits and other perquisites. It also includes post-employment benefits such as provident fund, superannuation fund, gratuity, pensionary benefits etc.

Post-employment benefits and other long term employee benefits

Short term employee benefit obligations are estimated and provided for in the statement of profit and loss.

- Defined contribution plans

Company's contribution to provident fund, superannuation fund, employee state insurance and other funds are determined under the relevant schemes and/or statute and charged to the statement of profit and loss in the period of incurrence when the services are rendered by the employees.

- Defined benefit plans and compensated absences

Expenditure on compensated absences and termination benefits (including expenditure on gratuity, voluntary retirement scheme, etc.) is recognised in the statement of profit and loss in the period of incurrence.

15 Inventories

Inventories are valued at the lower of cost and net realisable value after providing for cost of obsolescence. The method of determination of cost is as follows:

a. Finished goods - comprise the purchase price, import duties and other taxes (other than those subsequently recoverable by the entity from the taxing authorities), and transport, handling and other costs directly attributable to the acquisition of finished goods. Trade discounts, rebates and other similar items are deducted in determining the cost.

ICDS II as prescribed under section 145 of the Income Tax Act, 1961 requires 'Purchase cost' to include duties and taxes, freight inwards and other expenditure directly attributable to the acquisition.

Further section 145A of the Income Tax Act, 1961 requires valuation of purchases, sales and inventory be adjusted to include the amount of tax, duty, cess or fees (by whatever name called) actually paid and incurred to bring the goods to the place of its location and conditions as on the date of valuation.

After including taxes, duties, cess etc. to inventory as well as purchases, sales and payments made or expenditure incurred of these taxes, duties, cess, etc. to comply with the provisions of section 145A the overall impact of the adjustments made on the income of the assessee is nil. Accordingly, even the exclusive method followed as per Accounting Standards issued by ICAI for the purpose of valuation of inventory is tax neutral.

16 Provisions, Contingent liabilities and Contingent assets

A provision is recognized when there is a present obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

When there is a possible obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

17 Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amount of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents.

18 Borrowing Cost

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset. Where, a qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Substantial period of time primarily depends on the facts and circumstances of each asset. However, ordinarily, a period of twelve months is considered as substantial. Other borrowing costs are recognised as an expense in the period in which they are incurred.

Exchange differences arising from foreign currency borrowings and considered as borrowing costs are those exchange differences which arise on the amount of principal of the foreign currency borrowings to the extent of the difference between interest on local currency borrowings and interest on foreign currency borrowings. Thus, the amount of exchange difference not exceeding the difference between interest on local currency borrowings and interest on foreign currency borrowings is considered as borrowings costs and the remaining exchange difference, if any, is accounted for under AS 11, The Effects of Changes in Foreign Exchange Rates. For this purpose, the interest rate for the local currency borrowings is considered as that rate at which the enterprise would have raised the borrowings locally had the enterprise not decided to raise the foreign

19 Current assets, loans and advances

Current assets, loans and advances are of the value stated if realisable in the ordinary course of business.

20 Loans and borrowings

Secured as well as unsecured loans are stated at full value of liability payable on the date of balance sheet or future date.

(Amounts in INR Lakh, unless otherwise stated)

21 Government grants and subsidies

Grants and subsidies from the government are recognized when there is reasonable assurance that (a) the company will comply with the conditions attached to them, and (b) the grant/subsidy will be received.

Where the grant relates to an asset, it is shown as a reduction from the gross value of the asset concerned in arriving at its book value. The grant is thus recognised in the statement of profit and loss over the useful life of the asset by way of reduced depreciation charge.

Where the grant relates to reimbursement of interest on term loan, it is recognised as a reduction from the finance cost of the term loan concerned.

Management has initiated the process of identifying enterprises, which have provided goods and services to the company and which qualify under the definition of micro and small enterprises, as defined under Micro, Small and Medium Enterprises Development Act, 2006 (MSMEDA) and circularized the letters for this purpose. But the company has received intimation from few suppliers regarding their status under the Micro, Small and Medium Enterprises Development Act, 2006 and hence the disclosures relating to amount unpaid as at the end of the year together with interest payable as required under the said act has not been furnished accurately and provision for interest, if any, on delayed payment is not ascertainable at this stage. However, in the opinion of the management it would not be material. The details of MSME classification for FY 2021-22 are not available.

Principal Factors Affecting Our Results of Operations:

We have applied the following accounting policies in preparing our financial statements for six months period ended September 30, 2024, Fiscal 2024, Fiscal 2023 and Fiscal 2022:

SIGNIFICANT ACCOUNTING POLICIES

1. Basis of Preparation

The financial statements have been prepared in conformity with the generally accepted accounting principles to comply in all material respects with the notified Accounting Standards (AS) under Companies Act, 2013 and the relevant provisions of the Companies Act 2013 (“the Act”). The financial statements have been prepared under the historical cost convention, on an accrual basis. The accounting policies have been consistently applied by the Company and are consistent with those used in the previous year.

2. Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenue and expenses during the reporting period. Difference between the actual results and estimates are recognised in the period in which the results are known / materialized.

3. Property, Plant and Equipment and Depreciation

Property, Plant & Equipment are carried at cost of acquisition less accumulated depreciation and its written down value is stated. Cost includes inward freight, duties, taxes and incidental expenses related to the acquisition, construction and installation of the fixed assets. Borrowing costs directly attributable to acquisition or construction of those fixed assets which necessarily take a substantial period of time to get ready for their intended use are capitalised. Depreciation is provided under straight-line method so as to write-off the cost of the assets over its useful life as prescribed in Schedule II of the Companies Act, 2013.

4. Intangible Assets

Expenditure on regulatory approval for Licenses for Sale of Goods in foreign countries is recognized as an intangible asset and the same is amortized over a period of five years & Expenditure on software development is recognized as an intangible asset and same is amortized over a period of five years.

5. Capital Work-in-progress

Cost and direct expense incurred for construction of assets or assets to be acquired and which are not ready for use are disclosed under “Capital Work-in-progress”

6. Leases

Assets taken on lease by the Company in its capacity as lessee, where the Company has substantially all the risks and rewards of ownership are classified as finance lease. Such a lease is capitalised at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognised for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognised as operating leases. Lease rentals under operating leases are recognised in the statement of profit and loss on a straight-line basis.

7. Impairment

- a) The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the assets net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital.
- b) After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.
- c) A previously recognised impairment loss is increased or reversed depending on changes in circumstances. However, the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation if there was no impairment.

8. Investments

Long Term Investments are carried at cost. Provision is made for any diminution in value of investments, if the diminution is other than temporary.

9. Employee Benefits

- (i) Post-employment benefit plans

Contributions to defined contribution retirement benefit schemes are recognised as expense when employees have rendered services entitling them to such benefits.

For defined benefit schemes, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in full in the statement of profit and loss for the period in which they occur. Past service cost is

recognised immediately to the extent that the benefits are already vested, or amortised on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, and as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of available refunds and reductions in future contributions to the scheme.

(ii) Other employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognised during the period when the employee renders the service. These benefits include compensated absences such as paid annual leave, overseas social security contributions and performance incentives.

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as an actuarially determined liability at the present value of the defined benefit obligation at the balance sheet date.

10. Revenue recognition

Revenue from sales is recognized as and when the goods are dispatched to the customers and invoice is prepared.

Other income is recognized on accrual basis and when there is reasonable certainty of its collection.

11. Taxation

Current Tax is the amount of tax payable for the year as determined in accordance with the provision of the Income Tax Act, 1961.

Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax after the tax holiday period. Accordingly, MAT is recognised as an asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with it will fructify.

Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis.

The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

12. Foreign currency transactions

Transactions denominated in foreign currencies are normally recorded at the exchange rate prevailing at the time of the transaction. Monetary items in foreign currencies at the balance sheet date are translated at rates as at the balance sheet date. Any income or expense on account of exchange difference either on settlement or on translation is recognized in profit & loss account except in cases where they relate to acquisition of Fixed Assets, in which case they are adjusted to carrying cost of Fixed Assets.

13. Earnings per share

The basic and diluted earnings per share is computed by dividing the profit/loss after tax available for equity shareholders by the weighted average number of equity shares outstanding during the reporting period.

14. Employee benefits

Employee benefit expenses include salary, wages, performance incentives, compensated absences, medical benefits and other perquisites. It also includes post-employment benefits such as provident fund, superannuation fund, gratuity, pensionary benefits etc.

Post-employment benefits and other long term employee benefits

Short term employee benefit obligations are estimated and provided for in the statement of profit and loss.

- Defined contribution plans

Company's contribution to provident fund, superannuation fund, employee state insurance and other funds are determined under the relevant schemes and/or statute and charged to the statement of profit and loss in the period of incurrence when the services are rendered by the employees.

- Defined benefit plans and compensated absences

Expenditure on compensated absences and termination benefits (including expenditure on gratuity, voluntary retirement scheme, etc.) is recognised in the statement of profit and loss in the period of incurrence.

15. Inventories

Inventories are valued at the lower of cost and net realisable value after providing for cost of obsolescence. The method of determination of cost is as follows:

a. Finished goods - comprise the purchase price, import duties and other taxes (other than those subsequently recoverable by the entity from the taxing authorities), and transport, handling and other costs directly attributable to the acquisition of finished goods. Trade discounts, rebates and other similar items are deducted in determining the cost.

ICDS II as prescribed under section 145 of the Income Tax Act, 1961 requires 'Purchase cost' to include duties and taxes, freight inwards and other expenditure directly attributable to the acquisition.

Further section 145A of the Income Tax Act, 1961 requires valuation of purchases, sales and inventory be adjusted to include the amount of tax, duty, cess or fees (by whatever name called) actually paid and incurred to bring the goods to the place of its location and conditions as on the date of valuation.

After including taxes, duties, cess etc. to inventory as well as purchases, sales and payments made or expenditure incurred of these taxes, duties, cess, etc. to comply with the provisions of section 145A the overall impact of the adjustments made on the income of the assessee is nil. Accordingly, even the exclusive method followed as per Accounting Standards issued by ICAI for the purpose of valuation of inventory is tax neutral.

16. Provisions, Contingent liabilities and Contingent assets

A provision is recognized when there is a present obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

When there is a possible obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

17. Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amount of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents.

18. Borrowing Cost

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset. Where, a qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Substantial period of time primarily depends on the facts and circumstances of each asset. However, ordinarily, a period of twelve months is considered as substantial. Other borrowing costs are recognised as an expense in the period in which they are incurred.

Exchange differences arising from foreign currency borrowings and considered as borrowing costs are those exchange differences which arise on the amount of principal of the foreign currency borrowings to the extent of the difference between interest on local currency borrowings and interest on foreign currency borrowings. Thus, the amount of exchange difference not exceeding the difference between interest on local currency borrowings and interest on foreign currency borrowings is considered as borrowings costs and the remaining exchange difference, if any, is accounted for under AS 11, The Effects of Changes in Foreign Exchange Rates. For this purpose, the interest rate for the local currency borrowings is considered as that rate at which the enterprise would have raised the borrowings locally had the enterprise not decided to raise the foreign currency borrowings

19. Current assets, loans and advances

Current assets, loans and advances are of the value stated if realisable in the ordinary course of business.

20. Loans and borrowings

Secured as well as unsecured loans are stated at full value of liability payable on the date of balance sheet or future date.

21. Government grants and subsidies

Grants and subsidies from the government are recognized when there is reasonable assurance that (a) the company will comply with the conditions attached to them, and (b) the grant/subsidy will be received.

Where the grant relates to an asset, it is shown as a reduction from the gross value of the asset concerned in arriving at its book value. The grant is thus recognised in the statement of profit and loss over the useful life of the asset by way of reduced depreciation charge.

Where the grant relates to reimbursement of interest on term loan, it is recognised as a reduction from the finance cost of the term loan concerned.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I:

This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended until June 30, 2019. Under this phase, a RIB also had the option to submit the ASBA Form with any of the Designated Intermediaries and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II:

This phase had become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. However, the time duration from public issue closure to listing continued to be six Working Days during this phase. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

Phase III:

This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The processing fees for applications made by UPI Applicants using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy and FEMA has been entrusted to the concerned ministries / departments.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“DPIIT”) issued the Consolidated FDI Policy, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. Under the current FDI Policy, 100% foreign direct investment is permitted in the manufacturing, under the automatic route, subject to compliance with certain prescribed conditions.

Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Applicant should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.
